STATE BOARD: Mr. M. C. Gordon, Miss Weaver and Mr. Jack.

Functions of the Faculty Committees

(All acts of the faculty committees are subject to the approval of the Principal)

Advanced Standing: This committee shall determine the value of all work done in other schools which is offered by entering or prospective students for advanced standing here, and shall report its findings to the Principal.

ATHLETICS: This committee shall have general supervision over all public athletic games, exhibitions and contests, and shall have control over the arrangements for such games, exhibitions and contests with other schools or associations.

It shall have control over the finances and property of the Athletic Association, and over the purchase of needed athletic supplies.

It shall decide what candidates for membership on teams or for admission to athletic games, exhibitions and contests shall be eligible, and it shall exclude from participation those whom it finds below the standard in their studies, or ineligible for any other cause.

Classification: This committee shall enroll and classify all students.

It shall see that a full and correct registry of students be kept in the office, with copies of individual programs. Subject to such regulations as may be adopted by the Principal, it shall pass upon all requests for changes of program.

It shall see that the grades made by students each term are duly reported to the recording official.

It shall follow up students' work and discipline delinquents, when in its judgment it thinks best, and also offer such advice and encouragement as seem wise.

It shall have the power to call upon teachers for weekly reports of the standing of students whose work is under its consideration.

COMMENCEMENT: This committee shall have general directive charge of the affairs of Commencement.

It shall see that the diplomas are ready, and shall have proper programs printed.

Lectures and Entertainments: This committee shall select and contract for all lectures and entertainments for the regular Normal Lecture Course.

All entertainments, excepting those which come under the control of other regular committees or the Principal, must receive the approval of this committee and be subject to its regulations before they shall be permitted to appear in the Chapel.

DINING-ROOM: This committee shall have general charge of all dining-room matters not coming under the official control of the Steward; it shall do the seating; it shall see that good order is maintained, not only in the dining-room, but upon entering and leaving the same; in this work it shall have the cooperation of all members of the faculty.

Functions of the Faculty Committees, continued

1.111 RARY Societies: In working with committees appointed by the Societies, or in working with the Society officials, this committee shall represent the Faculty. It shall labor to make more effective and valuable the work of the literary societies, and to this end shall advise with the members of the societies from time to time.

It shall have general charge of all contests, inter-society, or inter-collegiate, and open meetings.

Any and all society meetings shall be open to the members of this committee, and they shall attend the meetings from time to time.

Program: This committee shall make out the term program, at least one week prior to the opening of the term.

The committee may, when it deems best, consult with other members of the faculty relative to the schedule but it shall have power to make out the program as it seems best in its judgment, and when so made and approved by the Principal, the same shall be final.

*Recommendations and Position: This committee shall assist graduates and qualified students to secure positions to teach, and shall aid school officials in procuring teachers.

It shall collect complete and accurate information respecting all applicants for positions to teach who ask the assistance of the committee.

Religious Work: It shall be the function of this committee to assist and encourage the students in all religious work. It shall advise with the officers of the Y. W. C. A. and the Y. M. C. A.

School Magazine: This committee shall have general charge of the publication known as the Normal Herald.

SOCIAL LIEF: This committee shall have general and executive charge of the social life of the students. It shall have charge of the Saturday evening social, of the Hallowe'en and Washington's Birthday events, and such other affairs as the Hauxhurst spreads, hay-rides and sleigh-rides.

STATE BOARD: It shall be the duty of this committee to make all needful preparation for facilitating the work of the State Board of Examiners.

*Note: -The Normal, through its Committee on Recommendations and Positions, is prepared to give systematic aid to its graduates and students in securing sintable positions to teach.

The committee seeks to assist school authorities in procuring competent teachers. The plan is to recommend, candidates best sinted to till vacancies and not to send out general letters of recommendation.

School authorities who write the committee will have full and confidential information in regard to applicants

School officers are cordually invited to visit the Normal to inspect the work of those whom they may wish to secure to fill positions. Correspondence is invited from Boards. Principals and Superintendents in regard to vacancies and teachers. This information will be treated in full confidence and all possible assistance will be gladly given.

While the chief work of the committee will be to help the students who are in attendance, yet it is the number to lend assistance to graduates and former students in securing for themselves more satisfactory positions. To this end, the full cooperation of Alimini and former students is earnestly desired. Write to the commuttee when in need of a teacher. Supply information concerning vacancies.

All correspondence in regard to location of teachers should be addressed to the Secretary or the Principal

JANE LEONARD HALL NORMAL RECITATION BUILDING:

SCHOOL

HE plan of this Institution was conceived in the sixties, the first money, some twenty thousand dollars, being subscribed for its founding in 1869. The first recognition by the State was through an act of the General Assembly in 1871, but the

school was not opened until May 17, 1875. Its first principal was Dr. E. B. Fairfield, who afterwards, as the first Chancellor of the University of Nebraska, so largely influenced the future of that institution.

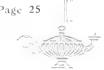

Among the notable men present upon the opening day of the school was one of Pennsylvania's most famous educators, then State Superintendent of Public Instruction, Lames P. Wickersham, who stated in his public address that it was his opinion that Indiana's first building was the largest, finest and bestplanned structure devoted to normal school education in the United States. A monument to its founders, that building still stands, and in honor of the first president of the board of trustees, it is known as John

In 1803 there was erected upon our campus a brick residence for men students. The building was forty by one hundred feet, and consisted of a basement and three stories. In February, 1906, this building burned to the ground. There were excellent fire escapes, so not only were no lives lost, but there were no serious injuries.

The ruins were not cold before the trustees were

planning for a larger and better dormitory for our young men, and in January, 1907, the Indiana boys took possession of one of the best school residences for men in the State. The building stands upon the site of the old one, but is somewhat larger, and is known as Clark Hall, in honor of the board's second

president, the late Justice Silas M. Clark, of the Supreme Bench.

In 1803, also, the board erected, to the northward of the main building, the Model School, and named it in honor of their third president, the A. W. Wilson Hall. This building contains eight large, airy classrooms, with ample playrooms in the basement for use on stormy days.

The year 1903 marked a strong advance in Indiana's material equipment. The Normal's Recitation Hall was then erected. It stands just to the southward of Wilson Hall, completing the east wing of the quadrangle. A stately structure it is and one of the most beautiful on the campus. The dimensions are a frontage of one hundred thirty feet and a depth of one hundred twenty-three. The building is the school proper of the Normal and contains (wenty-four large, beautiful rooms. The trustees honored themselves by naming this building after one of their most widely known and most faithful teachers, Jane E. Leonard.

During that same year there was erected to the westward of the south wing of John Sucton Hall another most beautiful and imposing structure, one hundred twenty-three by ninety-two feet in size and three stories high. In the basement of this building is the laundry and storage, while on the first floor are the kitchens, dining-rooms, and the Steward's office; the Musical Conservatory occupies the second story. while the third floor is used as a dormitory. This building is known as Thomas Sutton Hall, in honor of the President of the Board of Trustees.

During the past lew years something more than

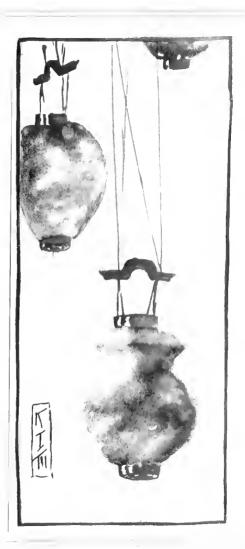

\$50,000 have been spent in improving the institution's plant, the most noteworthy improvement being the erection of a cold storage plant in connection with the refectory. This cold storage plant is pronounced by experts to be one of the very best in all the country. It enables the school to manufacture its own ice, and to turnish its students at all times with the choicest fresh meats.

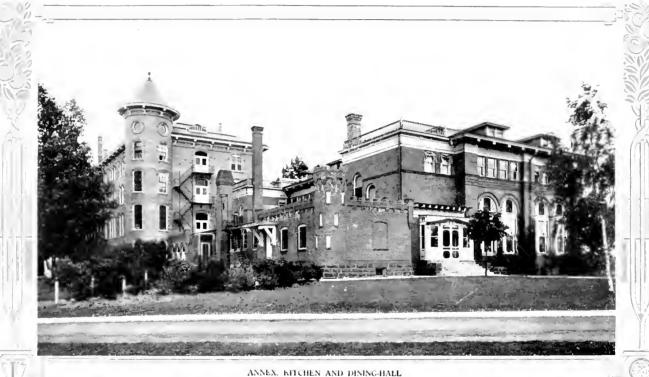

During the past year two notable additions to our buildings have been made—an annex to the dining hall, seating from eighty to one hundred; and an annex to the girls' dormitory, accommodating sixtytwo girls. The dining-room annex contains a very large fireplace, which promotes good cheer and helps the ventilation materially. The annex to the girls' dormitory affords to each two girls occupying it a suite consisting of a sitting-room and bedroom. There are two large wardrobe closets, one for each girl. In the bedroom each girl has her own bed, and there is a porcelain layatory supplied with hot and cold water. No dormitory, however high the charges of the school, affords its occupants better rooms than these. This building is practically fire-proof, and its bathrooms—one on every floor—are tiled and finished in Italian marble. Occupants of these rooms pay from seventy-five cents to one dollar a week extra-

Indiana's student growth has never been phenomenal, but it has been sure, and has increased from 328. the total enrollment of that first term back in 1875. to nearly 1,500, the number for the year just closed, the largest in its history.

Material Equipment

Page 28

Material Equipment

The Buildings

These have already been quite fully described. They all are built of stone and brick in the most substantial manner, and are heated by steam, direct or indirect, with the fan system. The main building, used as the girls' residence, is equipped with a large hydraulic passenger elevator, running from the basement to the top floor, which makes the upper floors more desirable in some respects than the lower ones.

During the past year the Trustees had an additional passenger elevator installed in this building. This elevator has double the capacity of the old one, which is still in first-class condition, and in daily use. The new elevator is of the electric type. It was installed by the Otis Elevator Company, and is one of the very best manufactured by that noted concern.

This entire building is heated by steam and lighted by electricity. Every floor is supplied with an abundance of hot and cold water, and the bathrooms, lavatories and water-closets are of the most approved patterns.

On account of our method of lighting and heating, the possibility of a fire is small, while danger from it is reduced to a minimum by ample arrangements for extinguishment, and by fire-escapes abundantly provided for each floor and for each room. Two new and improved fire-escapes were added this past year.

In brief, this immense building is planned and furnished throughout for the convenience, safety and success of its occupants.

Each student's room is furnished with a bedstead, a bureau, a washstand with necessary china, two chairs, a study table and a neat case of bookshelves. All rooms are carpeted and have plain shades to the windows.

The night watchmen have their headquarters in this building, and make the rounds of all the buildings on the campus four times each night.

Each student's room in the boys' dormitory is furnished with two single iron bedsteads, a bureau, a washstand with necessary china, two chairs, and a studytable. The windows are provided with plain shades.

The Laboratories

For physics, chemistry and biology are located on the first floor of Leonard Hall. Few, if any, normal schools in this country are better equipped for science work than is Indiana.

These laboratories are supplied with every necessary instrument and equipment for individual study.

The Library

A good reference library is accessible every day to all students. Here are found the leading encyclopedias, dictionaries and other standard reference books, historical charts, maps and other conveniences so essential to successful student life.

There is also a large library of choice works of history, biography and literature free to all students.

It is not the aim to mass books merely for the sake of making a large library; but we do aim to have every usable book and periodical.

The additions to the library during the year will aggregate about five hundred volumes.

In connection with the library is a reading-room, supplied with newspapers and periodicals as follows:

American Boy. American Isducation. American Homes and Gardens. Late. American Journal of Nursing, American Journal of Psychology Living Age, American Magazine, American Primary Teacher. Atlantic Monthly. Bookman Blackwood's Edinburgh Magazine. Business Educator. Century. Chantanoua. Collier's Columbia University Quarterly: Outing. Cosmopolitan. Craftsman. Current Literature. Dietetic and Hygiene Gazette. Delineator. Education. Educational Review. Elementary School Journal, Linde. Liverybody's, Forum. Harper's Bazar, Harper's Monthly. Harper's Weekly. Independent. Punxsutawney Spirit, Republican Standard, Rural Valley Advocate, United Presbyterian.

The Infirmary

Is pleasantly located in a retired portion of the south wing of John Sutton Hall. This Infirmary, by every physician who has ever seen it, has been pronounced to be one of the finest and best in the state. It contains three tiled bathrooms, a dispensary, a kitchen and dining-room, nurses' private quarters, ample closets, ward for girls, private room for girls, ward for boys, and private room for boys. The west end is fitted for boys, the east for girls. These two apartments are separate and distinct, being divided by a hall.

Every sanitary precaution is here taken, and every

In the Library

necessary arrangement is provided for the intelligent care of the sick. A graduate nurse is always in charge. Many a serious illness has been averted by early caring for the student in this Infirmary. The excellent health of our girls is proverbial, and the Infirmary is responsible in no small degree for it. No extra charge is made for care in the Infirmary, not even for the consumption of common remedies, a stock of which is always on hand. But in case the illness is such as to require the care of a physician or special nursing, the student pays that cost, and the cost of filling the physician's prescriptions. At some distance from the main buildings, and off the campus, the Institution maintains a small hospital to which cases are confined if there is cause to suspect contagion.

In short, every precaution is taken to protect the

health of the Indiana student; and during more than a third of a century but two deaths have occurred in the Institution, and it has never suffered from an epidemic, notwithstanding the thousands who have been under its care.

Students, who because of severe or prolonged illness have to be transferred to a private hospital, have to pay the expense incurred at such institution and the cost of the transfer.

Students, who because of suffering from a contagious disease have to be removed to the school hospital, have to pay five dollars a week while in the hospital for nursing, and no deduction is made from the regular term payments.

Boarding

The boarding department of this school is under the charge of a Steward of wide experience.

All who visit the Institution are delighted with its beautiful, spacious dining-room, and its immaculately clean kitchens, fitted up with every modern appliance of worth. The kitchen is presided over by an expert chef. There are four assistant cooks. The great bakeovens are in the basement. We bake all our bread (white, Vienna, Graham, whole wheat, corn-bread and biscuit), pies and puddings. A professional baker has charge of the ovens.

All water served on our tables is from our own wells, drilled to a depth of more than two hundred feet.

Each table seats from eight to twelve and so far as possible is presided over by a teacher.

It is the Steward's aim to provide good, substantial, wholesome food. While it is plain, it is always the best quality to be found on our markets.

It is doubtful if there is another school in the country, whatever its character or charges, that pro-

vides a greater variety of, or more wholesome, food for its students than does Indiana. Our bills-of-fare vary with the seasons. Ice-cream is regularly served twice a week. Special meals are prepared for the sick.

Students are permitted to room and board with private families, or to room in private homes and take meals in the school, at the discretion of the Principal only.

Laundry

The Institution owns a first-class Laundry, and has it under the management of competent people. The

price of board here includes free laundry to the extent of ten plain pieces a week, in addition to towels and napkins. In the basement of the girls' residence is a place to do washing and ironing for the use of girls only, and many of them attend to the laundering of their own handkerchiefs and other small pieces.

Outfit, Rooms, Washing

Octiff. Students are expected to provide themselves with towels, table napkins, soan and other needful toilet articles.

Rooms. Students in actual attendance at the close

of one term are entitled to preference in the choice of rooms for the next term. But room will be reserved. in girls' dormitories, for such of the above students only as make a deposit of five dollars with the school, If the student making deposit returns at the opening of the next term and claims her room, the deposit of five dollars will be deducted from the regular payment then to be made; otherwise, the deposit is for feited to the school. All other students are entitled to choice of rooms in the order of the receipt of their application.

No rooms, selected by or for students, will be held for them beyond the second day of the term, except upon special agreement to that effect, and charge will in all cases be made for rooms thus held.

Each room is intended to accommodate two boarders, and the scale of prices given in this catalogue is arranged accordingly. Where the student, by his own choice, occupies a room alone, an extra charge will be made. Students may not room alone, except with the permission of the school's authorities.

Wasmyo. Each student is entitled to the washing of ten plain pieces in addition to towels and napkins,

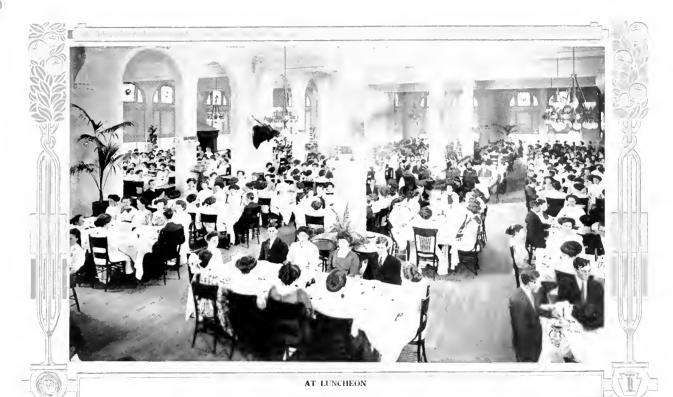

All articles sent to the laundry must be plainly marked with the name of the owner in some indelible form, and should be in a laundry-bag.

Location

The Institution is fortunate in its location, the site being one of great natural beauty, while the surround ing town is characteristically beautiful, and has devel oped those moral influences so desirable in the seat of an institution of learning. The town has a population of more than 6,000, and maintains churches of the following denominations: Methodist Episcopal, Free Methodist, Episcopal, Presbyterian, United Presby-

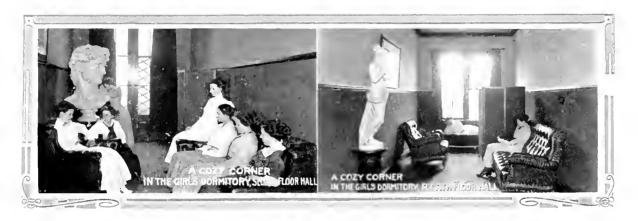

terian, Catholic, Lutheran, Baptist, Wesley an Baptist, German Lutheran and Christian.

Growth and improvement have especially marked Indiana in the past few years, and bid fair to continue. Many blocks of excellent brick paying have been laid, and contracts for many more have been let.

The place is reached by rail without difficulty, being the northern terminus of the "Indiana Branch" of the Pennsylvania, the change from the main line being made at Blairsville Intersection, where the Indiana train awaits the main-line train. The Indiana Branch connects at Blairsville with the West Penn. Division. Indiana is also on the Buffalo, Rochester and Pittsburgh, which gives connections with all northern points. The Institution is within ten minutes' walk of either depot. The Pennsylvania stops all its trairs at the "Campus Landing" on the first day of each term. Both the railways put on extra coaches at the opening

of each term in order to accommodate all, if possible, with seats.

During the past year, the Pennsylvania has run a special train for Indiana students only, from our campus direct to the Union Station at Pittsburgh, at the close of each term. The train is chaperoned by teachers. The Company will continue this custom, a courtesy greatly appreciated by the school, and its many patrons.

Telephone connection can be made from the mainbuilding with all leading points.

Reference has been made to Indiana's naturally beautiful location. Here in the foot-hills of the Alleghanies, thirteen hundred feet above sea-level, with a clear, pure atmosphere, its inhabitants have always been free from miasmic or malarial complaints. For more than a third of a century the health record of the school has been phenomenal.

Page 36

Our campus, comprising twenty-three acres, has its natural beauty greatly enhanced by the constant care of a landscape gardener; but its beauty is much more graphically told than mere words can do, by the photographic reproductions running through this volume. It is the belief of the Institution's authorities that such surroundings are a potent factor in the upbuilding of the student's character.

PENNSYLVANIA

Purpose and Function of This School

Pennsylvania, in common with most of the American States, realized practically from its founding the necessity of an educated citizenship. It is axiomatic that a just and efficient government must and will be controlled and administered by the educated; hence, the genius of our government implies an educated citizenship. This attitude of the State toward the instruction of its people makes it the one competent agency in supplying qualified teachers for its schools. This, the State of Pennsylvania does through its Public Normal Schools, whose function is the preparation of teachers for the common schools of the State. The Jearning and training imparted by the State through its Normal Schools has not for its purpose the bettering of the condition of one class of persons at the public expense: the school does not exist for the benefit of its students simply, but for the benefit of the whole people, and its work is done with the general welfare always in view.

It is sometimes declared by some well-meaning critic that the normal should be "a purely professional school," meaning that the school should not do academic work, but devote itself to the teaching of pedagogics, psychology, the philosophy of education, etc. All experienced trainers of teachers realize the inefficiency of such work. Those so trained rarely make successful teachers. As well might medical students devote their time to the study of diagnosis and the theory of disease, apart from materia medica and the common diseases encountered in actual practice. The average high school graduate has been away from the common school subjects for from four to five years. His knowledge of those subjects was obtained at an immature age. In his normal school course they must be reviewed from the standboint of a teacher. His view will be very different from the view he had as a child. The normal school must not only teach how to teach, but what to teach and the educational value of study subjects. True, it cannot and does not con-

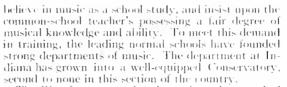

fine its courses to common school subjects, realizing the necessity of having the content of its courses broad and cultural. These facts make the normal school a desirable institution in which to obtain a general education for any purpose in life. More and more, farseeing parents have recognized this, and have insisted mon the privilege of paying full tuition for having

For thousands of years, thoughtful men have realized the peculiar educational and cultural value of music, and its psychological effect in giving tone and sanity to mental life. American educational leaders

their children educated in the normal school, thus

benefiting by its peculiar excellence.

The life of a community determines the practical side of its school education. America is a business country; hence, in its cities everywhere high schools are offering business courses. To prepare teachers for this class of high-school work, this Normal maintains a Business School. So thorough and excellent is the course that many graduate from it, not to teach, but to take up business careers. In short, it is the purpose of this Institution to prepare teachers for every grade and kind of teaching of wide demand.

Discipline

All questions of internal organization in a school must be determined by the fundamental conception of the function of the school. In determining the nature and character of discipline in a normal school, the function of the institution makes it necessary that it be but slightly, if at all, reformatory in its nature. The general welfare of the State would not be promoted by licensing one of evil tendencies or certain shortcomings to teach in the schools of the commonwealth.

It is, therefore, the policy of the administrative authorities to ask any student who does not conduct herself or himself in all things as become the lady or gentleman, or who is found not to be adapted to the life and work of the school for other reasons, to withdraw from the Institution.

In the government of the school, the largest liberty consistent with good work and order is allowed. The disciplinary power of the Institution is brought to bear

Page 38

upon the student, only to bring him to a rational understanding of freedom, and to lead him to such selfgovernment as will make him capable in the future of wisely governing others who shall become his pupils.

It is the desire and aim of the Faculty to make the government in the school ethical in its basis.

Religious Influences

This school is not denominational in any sense. Its authorities, however, aim to make it a place of gentle but positive Christian influence. To this end family worship is held daily, and students are required to attend the church of their own choice on Sunday mornings.

The Y. M. C. A. and the Y. W. C. A. aid in the religious culture of all whose homes are in the Institution. They include a large portion of the students. These associations have charge of the Thursday evening prayer-meetings, and hold a joint meeting Sunday evenings. Endeavor is made to promote Sabbath observance.

Students are thus encouraged to become Christian workers, and school life is made to minister to the elevation of Christian life.

Besides these associations, there are various others of a practical type and in a highly prosperous condition.

The denominations that maintain churches in Indiana were mentioned in describing the School's location.

The Lecture Course

The Institution maintains an excellent free lecture course for its student body. On this course is always to be found the best obtainable talent. During the past season our students had the privilege of hearing in the Chapel, among others

Jacob Riis. Redpath Grand Quartette, Music. Leland T. Powers, Dramatic Reader. Nox McCain (Three Lectures), Travel Studies, J. S. Martin, Civil Reform, John Kendrick Bangs, Lecture, John Mitchell (on Labor Unions).

Social Life

The residence of the young ladies and that of the young gentlemen who attend this Institution are entirely separate. All use the same dining-room, however, which adds greatly to the social and cultural life of the school. All social events in which the sexes mingle are under the direct charge of a faculty committee.

Student Organizations

Literary Societies

The Erodelphian Literary Society was founded during the first years of the School. Its purpose is to give students an opportunity for practice in public speaking, and parliamentary tactics. The Huyghenian is a similar society. Both these organizations have well-furnished halls, where they hold fortnightly meetings. The annual contest between these two societies has come to be an event in the life of the school, rivaled only by Commencement.

The Lincoln Debating Club

The Lincoln Debating Club is a new organization for men students. Its purpose is to develop ready and useful public speakers.

The membership is limited to fifty, and these are divided into three sections, each section debating every third week. The regular program consists of a prepared debate on some serious question of the day and impromptu speeches on current topics.

The chib has the benefit of a Faculty coach.

Fraternities

Omega Chi

The Beta Chapter of the Omega Chi fraternity was installed here in May, 1909. The organization has grown steadily in strength and influence, and is proud to number among its members some of the ablest boys in the school. It is heartily in favor of clean athletics, and as most of the boys are in some of the teams, it exerts its influence in that direction. At present it has some twelve active members in school.

Delta Phi Sigma

The Beta Chapter of the Delta Phi Sigma Fraternity was organized February 20, 1008. The purpose of the fraternity is to promote the general welfare of its members. Good moral and intellectual standing in the school is required for membership.

Sororities

Phi Kappi Pi

The Gamma Chapter of the Phi Kappa Pi was organized at Indiana in 1902 with a charter membership of 5. The Chapter at present numbers 16.

Pi Kappi Sigma

PENNSYLVANIA

The Zeta Chapter of Pi Kappa Sigma, a normal school sorority, was organized here in March, 1909. It supplements the social and literary training of its members, and maintains a scholarship and conduct test for membership eligibility.

Agonian Sorority, Alpha Kappa Phi

The Grand Chapter of the Normal School Sorority. Alpha Kappa Phi, at their convocation in 1910, granted a charter to a club of girls in our school, and recently installed them as a regular chapter in the fraternity. The organization is of many years' standing and is particularly strong in the State of New York, the Alpha Chapter being located at Genesco.

Alpha Kappa Phi is a link between College fraternities and normal school literary societies, the purpose being to get from school life the highest possible good. mental, moral and social. Teachers are admitted as active members.

Christian Associations

The students maintain two religious organizations —the Y. M. C. A. and the Y. W. C. A. These associations hold regular weekly meetings for devotional purposes, and occasional social gatherings. The meetings are a source of strength and help to the young people. The associations are factors for good in the School, and new students are cordially invited to identify themselves with them. Committees of the two associations meet all trains at the beginning of the terms to assist and direct new students.

Each of the associations has a furnished hall for its meetings.

Alumni Association

Indiana has graduated nearly two thousand teachers, and they constitute a loyal and enthusiastic band of supporters for their Alma Mater. The Alumni Association has been a useful factor, indeed, in the upbuilding of the School. Its services have been numerous and varied. But it is hoped that its influence may be made even more potent. No school can accomplish great things without the aid of a loval and enthusiastic alumni. Let us not forget the fact that in our union rests the strength that will make us a success in our professional life- that it is the

excellence of our work that gives reputation to our Alma Mater, and that her reputation is ours.

The Association holds an annual reunion at Commencement time. There is both a business meeting and a banquet.

Athletics

The Institution's reputation in athletics is so well known that comment is scarcely necessary here; the Football and Baseball teams have for years won a big majority of the season's games, and the Track Team has been the champion team among schools of our rank for years in Pennsylvania and surrounding states.

This Institution pays nothing to the men on its

teams, directly or indirectly, and all such men must be *bona fide* students. Our men play for the love of the sport and the glory of Indiana.

How to Enter the School

Upon arrival at Indiana, come at once to the Normal, but a short distance southwest of the Pennsylvania depot, and southeast of the B. R. and P. depot.

The Registrar's office is just to the left of the north entrance of the main building. All preliminary arrangements will be made here, when the students will go to Leonard Hall just north of the main building, to be classified. No student is classified who does not show the Principal's receipt for payments required at entrance. After classification, consult with the Preceptor or the Preceptress relative to the engagement of a room.

Graduation

In order to graduate from any Pennsylvania State Normal, the candidate must have passed examination by the State Board, in each of the three years of the State Course. Junior, Middle and Senior. The Board will not examine a student in all three of these years at one time; they will examine for the passing of the Junior and Middle years at one time. Students who show themselves capable of the work and strain are permitted to prepare for this examination in one year, and are classed as Junior-Middlers.

The last examination for persons taking the threeyear course will be held in June, 1913.

Cap and Gown

The regulation cap and gown, sanctioned by the Intercollegiate Bureau and Registry of Academic Costume, are worn by the Seniors of this Institution, upon the proper occasions.

The cost of the cap and gown ranges from \$4.00 up.

Suggestions to Prospective Students Come Early

Success demands that you be here early. Tardiness in the commencement of a term, or irregularity of attendance after the commencement, is a very serious hindrance to success. Be here and ready for work on the very first day and the very first hour of the term.

Time for Thorough Work

It often happens that an ambitious young man or woman, limited in means, and desirons of commencing life's active labors as soon as possible, determines to try to do two years' work in one, or that of three in two.

Such a course is scarcely ever advisable. One essential element in the teacher's preparation is time. Solid attainment is never a mushroom growth. Two years' work demands two years in which to do it well; and unless work is well done, the result will prove a source of regret through many years of mistakes, which might have been avoided had more thorough preparation been made. If you need more than a year for your work, and have only the means at command for one year's expenses at school, come for the year, and then, by remaining out of school for a time, make it possible to return and complete your course. It is not an absolute necessity that you graduate at a certain time; it is absolutely essential to your true success that you make thorough preparation.

Visits

Success demands concentration of thought. This is prevented by frequent visits at home or elsewhere, and usually time thus spent greatly hinders the progress of the student. Make few, if any, visits away from school.

Your Own Books

While you will find many books of reference here, still it is advisable for you to bring all the books you have, that you may make personal and daily use of them. The habit of such use is of incalculable importance, and the school life should ever minister to the formation of such habits as will lead to success in the after walks of life. Bring your books with you; place them where you can conveniently use them, and by their use form a habit, the value of which you can never overestimate.

Conform

It is the school's interest and purpose to serve you, but this it can do but poorly unless you conform to the life of the Institution. Make up your mind to get all the good out of the school you can. Come with the purpose of being happy in your work, of getting acquainted and entering heartily and cheerfully into the complete life of the school, making it all yours.

The School's Reputation Yours

The Indiana Normal proposes to maintain a high standard of excellence, both as to scholarship and as to attainment of skill in teaching.

Our inquiry is, and will remain, not how many we can graduate, but how many, and who, are thoroughly prepared for graduation.

For the sake of those who shall employ our teachers, and for the sake of the teachers themselves, we desire to make our diplomas valuable and preserve to them their value; and we trust that you will appreciate the fact that you must yourself contribute to so desirable an end.

Rules for Final Examinations, Admission to the Middle and Senior Classes, Etc.

(For all the Normal Schools of Pennsylvania

- 1. Admission to the Senior Middle classes shall be determined by the State Board of Examiners at the annual examination by the Board.
- 2. In order to be admitted to the Middle class at any State Normal School, students must be examined by the State Board in all the Junior studies (except English Grammar and Arithmetic), and this examination shall be final. Persons who desire to be admitted to the Middle class without having previously attended a State Normal school must pass an examination by the Faculty in all the studies of the Junior year and by the State Board of Examiners in the academic studies of the Junior year (except the Senior review studies) and Plane Geometry, or the first book of Casar, and must complete School Management in the Middle year.
- 3. In order to be admitted to the Senior class, students must be examined by the State Board in all the Middle year studies (except Methods), and this examination shall be final. Persons who desire to be

admitted to the Senior class without having previously attended a State normal school must pass an examination by the Faculty and State Board in the academic studies of the entire course except the review studies of the Senior year, and must devote their time during the Senior year to the professional studies of the course, and the review studies.

PENNSYIVANIA

- 4. If the Faculty of any State normal school, or the State Board of Examiners, decide that a person is not prepared to pass an examination by the State Board, he shall not be admitted to the same examinations at any other State normal school during the same school vear.
- 5. If a person who has completed the examinations required for admission to the Middle or Senior class at any State normal school desires to enter another normal school, the Principal of the school at which the examination was held shall send the proper certificate to the Principal of the school which the person desires to attend. Except for the reason here stated. no certificate setting forth the passing of the Junior or Middle year studies shall be issued.
- 6. Candidates for graduation shall be examined by the State Board in all branches of the Senior year. including English Grammer and Arithmetic. They shall have the opportunity of being examined in any higher branches, including vocal and instrumental music and double-entry bookkeeping; and all studies completed by them shall be named in their certificates.
- 7. Persons who have been graduated may be examined by any State examination in any higher branches, and the Secretary of the Board of Examiners shall certify on the back of their diplomas to the passing of the branches completed at said examination.
- 8. A certificate setting forth the proficiency of all applicants in all studies in which they desire to be examined by the State Board of Examiners shall be

prepared and signed by the Faculty and presented to the Board. The certificate for the studies of the Junior year shall also include the standing of applicants in the review studies in the Senior year.

NORMAL.

Regulations for Advanced Standing

(At Indiana)

1. Graduates of Accredited High Schools shall, without previous examination by the Faculty, be admitted to the lunior examination given by the State Board.

The passing of this examination admits to the Middle Year of the School.

- 2. Students who have done two or more years' high school work may enter the Middle year of the Normal; and if they do satisfactory work throughout the year, they shall be admitted to the Junior and the Middle examinations given by the State Board; provided, they present a certificate from the Principal of their high school, stating that the Junior work, as outlined for this school, has been satisfactorily done in whole or in part, and provided they have done all Junior work not covered by the certificate, to the satisfaction of the Facility.
- 3. Students holding Permanent Certificates will be credited with the subjects named on their certificates. Professional Certificates will be treated individually.
- 4. Advanced standing may also be obtained on work done in other State normals or colleges; but each individual case will be acted upon by the Committee on

Advanced Standing, at the time application for the standing is made.

5. Subjects included in the regular course of the Normal School, but not included in the High School, or other course on which advanced standing is based, must be studied at the Normal, in order to graduation.

NOTE—The State Board examinations in all years will be given at the State Normal School, Indiana, Pa. by the State Board on a date near the commencement. Those who are to take these examinations, and these examinations only, should be here on the day before that date. Those, however, who are to take the prehimnary examinations before the Laculty should be here a week earlier.

Examination of Practical Teachers

The Normal School law makes it the duty of the State Board of Examiners to grant diplomas or State certificates to actual teachers of common schools, without their having attended the Normal school as students, upon the following conditions.

1. The applicant must be twenty-one years of age,

of good moral character, and must have taught successfully in the common schools of this State during three consecutive annual terms immediately preceding the examinations. The proof of good moral character. and satisfactory teaching for the required time, must be a certificate from the proper Board or Boards of Directors, signed by the President and Secretary and countersigned by the proper Superintendent or Superintendents.

PENNSYDVANIA

2. The examination may be in either the Regular or the Supplementary Course, as the applicant may elect. according to the list of studies as printed in the circulars of the State Normal Schools and approved by the State Superintendent, or in such other studies as may, by the Board of Examiners, be deemed equivalent.

3. Each applicant is required to prepare and present to the State Board of Examiners an original thesis of not less than six folio pages of manuscript, on some professional subject, which thesis is to be retained at the school where the examination takes place.

4. The examination and certificate are without expense to the applicant, and the certificate is full evidence of qualification to teach the branches therein named, in any part of the State, without further examination.

5. Practical teachers attending examinations at the State Normal Schools for the purpose of procuring State Certificates are examined separately from the regular students, and both the State Board of Examiners and the faculty of the school at which the examination is held take part in the examination, all being required to sign the certificate.

Certificate and Diploma

The State Normal Certificate is issued to those who are graduated. It entitles the holder to teach in the

public schools of the State for two years without further examination. The State Normal Diploma is issued to graduates who have taught in the common schools of the State for two full annual school terms of not less than seven months each after graduation. and who present certificates of successful teaching from each of the school boards, countersigned by the county. city or borough superintendent. It is furnished without charge, unless the name is to be engrossed, in which case one dollar is charged.

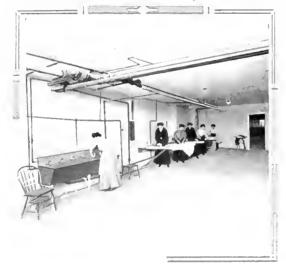

Degrees

Graduates of State Normal Schools, in the Regular course, and graduates of accredited colleges may become candidates for the degrees of Bachelor of Pedagogics (Pd. B.) and Master of Pedagogics (Pd. M.). To obtain these degrees, candidates must be examined by the Faculty and the State Board upon the studies of the Supplementary Course. Three years' successful teaching in the public schools of the State since graduation (or two years in the case of candidates who taught in the Model School) will be required of all candidates for the degree of Master of Pedagogics, in addition to the branches of Study indicated in the

Supplementary Course, Attendance at a State Normal School during the entire Senior year will be required of all candidates for graduation; but candidates for a pedagogical degree may prepare the required work in absentia.

Supplementary Course for the Degrees

(In addition to the Regular Course

Leading to the Degree of Bachelor of Pedagogies

Philosophy of Education (Horne), Advanced Psychology (Lames, Briefer Course).

Discussion of Educational Questions (Educational Amsand Educational Values, Hanns); or, School Supervision, in cluding School Law (Our Schools, Chancellor, Pennsylvania School Laws; Devices for Feaching Teaching of Elementary Mathematics, Smith); Educational Theories, etc. (Education as Development, O'Shea).

School Apparatus and Appliances, Description, Use and Preparation (Physical Nature of the Child, Rowe).

Leading to the Degree of Master of Pedagogics

Two years' teaching after graduation in the Regular Cours-Professional Reading with Abstracts, History of Education in the United States Boone, European Schools (Klemm Systems of Education (Parsons).

Sanitary Science, School Architecture, etc. School Hygien (Shaw).

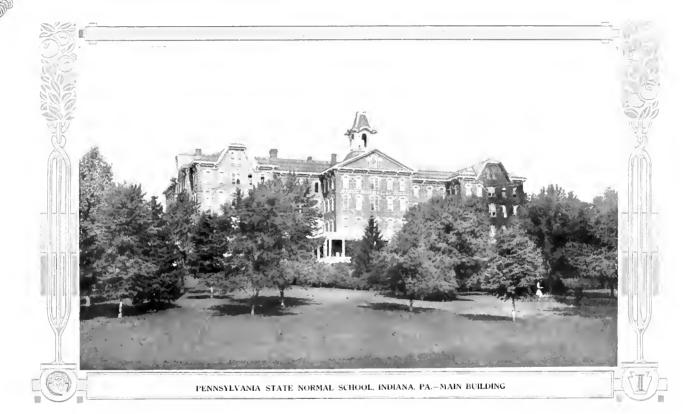

- Thesis

A full equivalent will be accepted for any of the text books named above. The course in reading and classics for all the courses shall be determined by the Board of Principals at their annual meeting, and shall be the same for all Normal Schools.

N. B. Candidates for degrees pay a fee of five dollars, to cover expense of examination.

Statement of Expenses

	Full year, 40 weeks	Fall term, 15 weeks.	Winter term, 13 weeks.	Spring term, 12 Weeks
*Total charge (including enrollment fee, board, room, heat, light and laundry) for boarders preparing to teach. Total charge (including enrollment fee, tuition, board, room, heat,)	\$166 00	\$62.00	\$54 00	\$50.00

Extras Drawing Typewriting Shorthand Elocution. Two lessons per week (private)	40 00	15 00 6 00 12 00 15 00	13 00 5 00 10 00	12 00 4 00 9 00
One lesson per week (private)		10 00	14 00 8 00	7 00

The cost of books is an item of expense that cannot be determined, because a student can take a longer or shorter program as he may elect, and because he may own part of the books that he will need; but it has been found, by long experience, that the average rental for books amounts to about \$1.50 per term.

Vacation and transient board, \$1.00 per day; lunch only, \$1.00 per week

A few rooms have been recently fitted up on the second floor of John Sutton Hall for which a special price is charged. There are also in various parts of the building, a few suites for which an extra charge is made. In the Annex an extra charge of from seventy-five cents to one dollar a week for each occupant is made. These rooms come en suite, each occupant has her own bed and wardrobe, and the bedrooms are supplied with layatories furnishing both hot and cold water. Girls occupying rooms for which no extra charge is made will pay fifteen cents extra per week if single beds are provided, to meet the extra expense of laundry for bed linen.

We have a very limited number of small rooms that are let for single occupancy, at an extra charge of seventy five cents a week. In case a student is permitted to occupy a double room alone, she must pay one dollar a week for the privilege. If the room is one for which extra rent is charged, the occupant, in addition to the above-mentioned charge of one dollar, must pay the full extra that two girls would pay. For instance, if a student were occupying alone one of the best suites in the Annex, she would pay three dollars per week extra. With a room-mate, in the same room, she would pay but one dollar extra per week.

*FRFF_IVITION The State pays the tuition of students who comply with the conditions set forth in the following statute passed by the Legislature of Pennsylvania in 1905

For each student 17 years of age, who shall sign an agreement binding said student to teach in the common schools of this State two full annual terms there shall be paid the sum of one dollar and lifty cents a week in full payment of the expenses of furtion of said students.

Provided. That each student in a State Normal School, drawing an allowance from the State, must receive regular instruction in the science and art of

teaching in a special class devoted to that subject for the whole time for which such an allowance is drawn.

In case of a deficit in the State appropriation, students at the different State Normal Schools will receive their pro-rata share of the appropriation, and will be required to pay balance to the school.

Amount and Time of Payments

At beginning of Term	Fall Term		
All day students taking State			\$2 00
All day students not taking			24 50
All boarding students will pa		· · · · · · · · · · · · · · · · · · ·	, , 62 00
The above payments include the	enrollment fee.		

At middle of term, October 30th, all bills for extra room rent, music, extra charges for any courses outside the regular normal courses, etc., are due from all students. The regular normal tuition amounting to \$22.50 is also due at this time from boarding students not taking State Aid.

Boarding students who are seventeen years of age, or over, and are preparing to teach in this State, do not have the regular normal tuition to pay. Such students, unless they have incurred extras as mentioned above, have only the first payment of \$62.00 to make during this term.

At beginning of Term—	Winter Term		
All day students taking State Aid will p	ay	 	\$2.00
All day students not taking State Aid w	till pay	 	21 50
All boarding students will pay		 	54 00

At middle of Term, February 12th, bills covering the same items as for the middle of the Fall Term fall due. The regular normal tuition for the Winter Term is \$19.50.

At beginning of Term:	Spring Term		
All day students taking Sta	te Aid will pay	 	\$2.00
All day students not taking	State Aid will pay	 	20.00
All boarding students will p	ay .	 	50 00

At middle of Term, May 20th, bills covering the same items as for the middle of the Fall Term fall due. The regular normal tuition for the Spring Term is \$18.00.

How to Pay Bills

An "enrollment fee" of two dollars for each term is charged all students, and is included in all first payments. This fee entitles the student to a ticket of admission to all athletic events, the course of the University Extension lectures and all other lectures under the auspices of the school.

State Aid is not credited before the end of the term.

Bank Drafts, Checks, Express and P. O. Orders are accepted. Payments must be made, or satisfactorily provided for, before students are assigned to classes.

Students desiring to leave school before the close of the term must report to the Principal and settle any unpaid accounts.

Visitors expecting to remain more than three days are requested to make arrangements in advance with the Principal.

All bills are payable to the Principal,

Statement of Expenses in Conservatory

	Full year,	Fall term,	Winter term,	Spring term,
	40 Weeks	15 weeks	13 weeks	12 weeks

	155 00	58 00	52 00	45-00
Private Lessons Two lessons per week in either Voice, Piano, Organ or Violin One lesson per week	75 00	27 50	24 50	23 OO
	15 00	18 00	15 00	12 OO
CLASS LESSONS—Two pupils in a class. Two lessons per week in either Voice, Piano, Organ or Violin One lesson per week Two lessons per week in either Harmony, Counterpoint, Analysis or History of Music	52 00 30 00	19 50 12 00 5 00	17 00 10 00 5 00	15 50 8 00 5 00
JUVENILE COURSE One lesson per week, two pupils in a class	20.00	7 50	6 50	6.00
RENT OF INSTRUMENTS Rent of Piano (45 minutes per day) Rent of Pipe Organ (45 minutes per day)	7 50	2 50	2 50	2 50
	30 00	10 00	10 00	10 00

N. B. - All pupils taking the Juvenile Course will be required to pay the full term tuition in advance. All others pay one half term in advance. No reductions are made for lessons lost except in extreme cases of protracted illness. N. B. Students who desire more than two periods a day for pain para tree will be given a discount of 50 cents a term for each additional period.

Deductions and Refunds

No deduction is made for absence the first two or the last three weeks of a term, for any cause whatever.

For absence four consecutive weeks or more on account of the student's personal illness, one-half the paid-in charges for the time lost is refunded; provided the student's physician in attendance certifies that the illness was of such a character as to render the student mable to attend school. A proper blank for this certificate will be furnished by the school.

When a student drops out of a strong and popular school, he vacates a place that might have been occupied by another who would have remained through the term. The school's expenses for light, heat, etc., are not lessened by the student's dropping out. The teachers who could teach him still remain and draw their salaries. For these reasons some of the best conducted schools will make no refunds for any cause, but insist upon a full year's payment in advance, against which no claims will be recognized. Indiana, however, as

indicated above, will share the loss with the parent or guardian where the absence is caused by the student's sickness.

In cases of light illness, a student will be cared for in our infirmary. No charge will be made for nursing. If the attendance of a physician is needed, the student must meet his charge. In case of serious illness, it will be necessary for the student to be removed either to her home or a private hospital, in which case the student must meet the charges.

The school maintains a small hospital to which persons suffering from a contagious disease are removed. Students occupying this hospital are charged five dollars a week for general care, not including that of a physician or trained nurse. No deduction from the regular charges of the Institution is made for such students because of time lost from their classes.

The Infirmary of this institution, with wards for both sexes, private rooms, dispensary, baths, buffet, etc., is one of the best and most complete to be found. It is at all times in charge of a professional nurse, of wide experience,

A Comparison of School Expenses

We are often asked by prospective students and parents contemplating the education of a son or daughter, if the charges at Indiana are reasonable. For the information of such we offer the following comparisons:

Indiana's charge for a full year of 40 weeks, for all fees, tuition, board, room, heat, light and laundry, in the Normal Department, is from \$166 to \$226.

The best of the smaller colleges of our State, such as Haverford, Lafayette and Swathmore, charge for board, room and tuition, exclusive of laundry and sometimes class fees, from \$300 to \$575 per year.

Phillips Academy in Massachusetts gives \$465 as "moderate" for tuition, board and room for one year, and \$595 as "liberal."

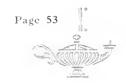

As an example of the cost of attending one of the great universities of high grade, we mention Princeton, where the *average* cost is \$568 a year.

Many of the country's best private schools charge from \$600 to \$1,500 a year, and the year in such schools seldom exceeds 36 weeks in length.

The State Normal is not designed to be a moneymaking institution; hence, its charges are kept down to the actual cost of maintenance.

Text Books

Stationery and text books used in the Institution can be purchased at the book room in the main build-

ing at regular prices; or the text books can be rented at reasonable rates by those who do not wish to purchase.

Any student entering the Institution, who has been a student during some previous term, will not be given credit in the book room until he has canceled any indebtedness that he may have left standing against him in that department.

The following is the list of text books in use:

ASTRONOMY—Todd.
BOTANY—Bergen.
BUSINESS—
Bookkeeping Williams and
Rogers.

Courses of Instruction

Courses of Instruction

Course of Study for Pennsylvania State Normal Schools

As revised and adopted at a meeting of Normal School Principals, held at Harrisburg, November 10, 1905

Regular Course

Studies marked with an asterisk ' are to be reviewed in Senior Year

Junior Year

Pi-dagggies: School Management.

LANGUAGE: English Grammar, *Reading and Orthography, Latin to Cæsar.

Mathematics: Arithmetic, *Algebra.

NATURAL SCIENCE: Physiology.

HISTORICAL SCIENCE: Geography, F. S. History, Civil Government of the United States and Pennsylvania.

Aris: Penmanship (an approved system with a fair handwriting), Drawing (daily lessons for at least 20 weeks), Vocal Music (elementary principles and daily exercise for at least to weeks), Bookkeeping (single entry, with a knowledge of common business papers).

Physical Culture.

Middle Year

Pedagogies: Psychology, Methods of Teaching. LANGUAGE: Rhetoric and Composition, with elocu

tionary exercises; three books of Casar,

Mathematics: Plane Geometry

NATURAL SCIENCE: Elements of Chemistry, Elements of Zoology, Botany.

HISTORICAL SCIENCE: General History.

Arrs: Manual Training. Physical Culture.

Senior Year

Proacogies: History of Education, Methods of Teaching, Practice Teaching in Model School (at least 20 weeks, forty-five minutes daily i, Thesis.

LANGUAGE: Literature and Classics, three Orations of Cicero, three Books of Virgil, Review of English Cirammar.

Mathematics: Solid Geometry, Plane Trigonometry and Surveying, Review of Arithmetic.

NATURAL SCIENCE: Physics, Elements of Geology.

Physical Culture.

Substitution

The following substitutions may be made:

It NOR YEAR: German or French for Latin.

MIDDLE YEAR: Greek, German or French for Latin or for Chemistry.

SENIOR YEAR: English History, Ethics and either Astronomy or Logic for Latin; Greek, German or French for Solid Geometry, Trigonometry and Surveying, or for Latin.

Notes

Subjects may be added to the Preparatory Course it the need arise.

Pedagogus I, in the Fall Term of the Junior Year, is preliminary School Management.

Perlagogies 1, in the Winter and Spring Terms, is School Management given 24 periods a week.

English I and English II shall be given 21 periods a week.

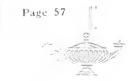

Pedagogics V and VI shall be given 2) periods a week.

All other subjects, where the number of hours is not stated, are daily subjects.

Greek, German, or French of the Middle Year may be substituted for Latin or for Chemistry of the Middle Year.

English History Fthics, and either Astronomy or Logic may be substituted for Latin, in the Semor Year, Greek, German, or French may be substituted in the Semor Year for Solid Geometry, Trigonometry, and Surveying, or for Fatin

No one will be graduated from the Three-Year Course after Commencement, 1913

Forty-five

Four-Year Course for the Pennsylvania State Normal Schools

Adopted by the Board of Principals, 1910

Students admitted to the First Year shall have a fair knowledge of Arithmetic, Reading, Orthography, Penmanship, United States History, Geography, Grammar, Physiology, Civics and the Elements of Algebra to Quadratics. Test by Faculty.

In the Third year the History of Arts and Science, may be inheritated for Green French or Greinan. Geology and Astronomy may be substituted for Solid Geometry and Trigonometry.

In the Fourth Verifithes Logic and Sociology may be sub-trivial for Virgil French and German. Philosophy of Education or Surveying may be sub-stituted for Fifth. Logic or Sociology.

Schools without examination, and be conditioned in the branches that have not been satisfactorily completed by such students.

Resolved: That residence for the last two years be required of all students, except in the case of graduates of four-year courses in colleges approved by the University Council, who may be graduated after one year's residence.

Resolved: That the new course go into effect in the fall of 1910; that in 1911 and 1912 students shall be graduated on basis of the old course; that in 1913 they may be graduated in either the old or the new course; that in 1914 and thereafter they may be graduated only in the new course.

The foregoing resolutions apply only to the Four Years' Course.

From the last resolution it is evident that in the fall of 1910 no students can be admitted into the third year of the Four Years' Course because no students will be graduated in the Four Years' Course in 1912.

But students may be admitted in the fall of 1010 into the first year of the Four Years' Course so as to graduate in this course in 1911; or, if sufficiently advanced, they may be admitted in the fall of 1910 into the Second Year of the Four Years' Course so as to graduate in this course in 1913.

Graduation from the Three Years' Course will be governed by the rules heretofore in force. Students who, in June, 1919, pass the examinations at the end of the Iunior Year can be admitted into the Middle Year of the Three Years' Course so as to graduate in the Three Years' Course in 1012. Students who, in lune, 1910, pass the examinations at the end of the Middle Year can be admitted into the Senior Year of the Three Years' Course so as to graduate in the Three Years' Course in 1911. Students can be admitted into the lunior Year in the fall of 1910 so as to graduate in the Three Years' Course in 1913. After the year 1913 students will be graduated only in the Four Years' Course.

Approved May 4, 1010. By Nathan C. Schaeffer. State Superintendent of Public Institution.

The above course is based on the "unit" plan as proposed by the Carnegie Foundation.

"A unit" represents a year's study in any subject in a secondary school constituting approximately a

quarter of a full year's work.

(This statement is designed to afford a standard of measurement for the work done in a secondary school. It takes the four-year high school course as a basis and assumes that the length of the school year is from thirty-six to forty weeks, that a period is from fortyto sixty minutes in length and that the study is pursued for four or five periods a week; but, under ordinary circumstances, a satisfactory year's work in any subject can not be accomplished in less than one hundred and twenty sixty-minute hours or their equivalent. Schools organized on a different basis can nevertheless estimate their work in terms of this unit.)

Students admitted to the First Year shall have a fair knowledge of Arithmetic, Reading, Orthography, Penmanship, United States History, Geography, Grammar, Physiology, Civics, and the Elements of Algebra to Quadratics. Tests by Faculty.

With reference to Conditions of Admission it was

Resolved: That properly certified graduates of approved Pennsylvania High Schools of the first grade and City High Schools as fisted by the Department of Public Instruction be recommended to the State Board of Examiners for entrance to the third year of the Four Years' Course of the State Normal Schools without examination by the faculty, and be conditioned in the branches that have not been satisfactorily completed by such students.

Resolved: That properly certified graduates of approved Pennsylvania High Schools of the second grade be recommended to the State Board of Examiners for entrance to the second year of the Four Years' Course of the State Normal Schools without examination by the faculty, and be conditioned in the branches that have not been satisfactorily completed by such students.

Resolved: That properly certified graduates of approved Pennsylvania High Schools of the third grade be admitted to the first year of the Four Years' Course of the State Normal

Department of Education

DR. AMENT MISS STRONG

Mr. Lesa MISS ACKERMAN

School Management:—The purpose of this subject is to lay a foundation for further work along educational lines. To do this it is necessary to acquaint the student with the fundamental principles of sanitation of school buildings, of good order, of successful recitation work, and with the relations of the school to the public.

Magazine articles, lectures, text-book work, and whatever else the instructors may deem necessary in developing the subject, will be used.

The course extends throughout the Junior year.

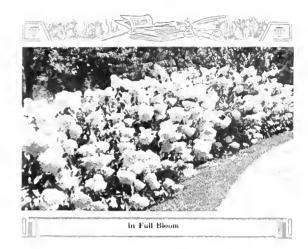

Psychology.—In the presentation of psychology, the instructor aims at no time to lose sight of the general culture value of the subject, while his aim is no less pointed in the matter of keeping before the consciousness of the learner the professional value and significance of the subject as the absolute basis of educational doctrine.

The second year is given to this subject.

Text: Dewey's Psychology.

METHODS.—The aim in Methods is to provide the student not merely with theoretical knowledge, but with working principles in order that he may be ready to put them into effect in the model school or elsewhere.

The work for the spring term of the Middle year will include a slight acquaintance with text, a thorough knowledge of the plan and development of a lesson, of the five formal steps, and the methods of teaching the various elementary subjects. Lectures will be given. The fall term of the Senior year will be devoted to the completion of text. The laws expounded will be carefully and practically applied by the students, who will teach and develop the various com-

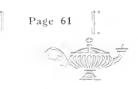

mon school branches before their classmates. The instructor will give criticism, and the students will learn the art of making just criticisms upon these presentations and also on future teaching.

Any suitable material that will aid in a clearer comprehension of subject will be used.

Text: McMurry.

HISTORY OF EDUCATION.—The general aim is to broaden the students' view of education. The special aim is to give a clear view of the general trend and progress of education; to help them to reason from effects to causes, to aid them in finding significant principles in great educational systems; to make some acquaintance with great educational reformers; to appreciate in some measure the forces that are operative in our own educational era.

Veranda, Principal's Residence

Some of the latest magazine articles will be used This course is pursued during the winter and spring terms of Senior year.

Text: Painter's History of Education.

PRACTICE TEACHING. The work of practice teaching is recognized as fundamental in all normal schools. Opportunity is here afforded for the normal students to manifest their aptitude to teach and to put into practice the principles and methods of instruction they have been faught. The work in this department at Indiana is divided into two sections—a class in observation and a class in actual practice teaching.

The class in observation is given opportunity to observe teaching done by competent teachers and each student is expected to reproduce the plan of the lesson observed and be prepared to take his part in the discussion which follows. By means of observation and discussion a student becomes thoroughly in sympathy with actual working methods before he is permitted to give instruction himself. During the Senior year, students are expected to devote an hour each day for two terms to practice teaching. These two terms of teaching, under the direction of those who are competent to point out defects and suggest their remedies, form one of the most valuable features of our professional course.

Each member is given a class of about twenty-five children, over whom he has entire control, to manage and to teach. The plan of his work is laid out for him and he is left free to execute it in his own way. If he is in doubt in regard to any point, the critic is accessible for consultation. To all intents and purposes the responsibility of the school is his. By means of this system of supervision, serious mistakes are avoided, and the student becomes familiar with the best ways and means for accomplishing desired results.

A student can judge of the value of his ideas only when he knows how the children will react to the stimuli presented. The practice school gives him the opportunity of forming these judgments under the most favorable circumstances.

Ermes.—The importance to the teacher of work in Ethics is readily seen from a consideration of the aim and scope of his work. Character perfected involves morality, and a teacher who has not a clear knowledge of the moral nature of the man and of the child, and who has not a clear conception of ideals of character and conduct, is unfit for the task.

When we consider the scope of the work of the teacher, the need for ethical study is evident. The matter of discipline is an ever-present task in the teacher's work. The right sort of discipline can be

secured only if the teacher has an ideal of the sort of conduct to be expected from the pupil, and an understanding of conditions under which the will of the pupil is best directed toward this ideal. Again, the teacher must prescribe courses of study, and should have a clear comprehension of the benefits to be derived for the character from certain lines of work.

It is upon such grounds as these that the course in Ethics is planned. The course has two parts, theoretical and practical Ethics. First, starting from Psychology, the facts of the moral nature are considered, and ideals of conduct and character are discussed. Second, the work of the teacher in this field is examined, the way in which different subjects of the school curriculum may contribute toward moral development are considered, and lesson plans are written and criticized from the point of view of their contribution toward character building.

For the Four Years' Course

SCHOOL MANAGEMENT.

Present such subjects as-

- L. Classification of pupils.
- Study of individual pupils.
 Recitations and examinations.
- 4. Rewards and punishments.
- 5. Moral culture.

Suggested texts: Seeley, White, Wickersham.

SCHOOL SANITATION.

Shall present the subject of—

- 1. Lighting.
- 2. Heating.
- 3. Ventilating.
- 4. Seating. Shaw.

METHODS, GENERAL.

Should present such subjects as:

- 1. Aims of education.
- Conditions to be studied.
- 3. Equipment.
 4. Technique.
- Methods in Reading and Penmanship and other elementary subjects not given special time in schedule. Suggested texts: Smith, Thorndyke, Murray.

Рѕусновобу,

- I. Physiological basis of Psychology.
- The presentative faculties.
 The representative faculties.
- 4 Thinking and reasoning.
- 5. The Feelings.
- 6. The Will. 7. Child Psychology.

The application of psychological principles to pedagogy should be the constant aim of the work.

HISTORY OF EDUCATION.

The following subjects should be included.

- 1. Biography of great educators.
- 2. History of important systems.
- 3. History of great schools.
- 4 Special history of the more common subjects of study.
- 5. History of important methods. Kemp.

METHODS IN ARTHMETIC.

- 1. The course of study.
 - a. Elimination.
 - b. State course of study
 - c. Other courses.
- 2. How to teach arithmetic in the primary grades.
- 3. How to teach in the grammar schools.
- How to teach in the granting schools.
 Sources for problems in the community life.
- 5. Devices for teaching arithmetic.
- 6. The literature of the subject.
- 7. Discussion of the pedagogical problems of the subject

METHODS IN HISTORY AND GROGRAPHY.

- 1. Psychology of perception and memory.
- 2. Definition of the field of History and Geography.
- 3. Correlation with other subjects.
- 4. Apparatus.
- 5 Plans and devices.
- 6. Exercises, maps, and equipment
- 7. Causes and conditions of historic development.

Department of English

MISS LEONARD MISS AGARD MISS SMITH MISS ORR MR. FORMAN MISS APPELGATE

ENGLISH GRAMMAR.

- Courses: 1. Sub-Jimior. A Grammar. B Grammar. C Grammar. 2. Senior Grammar.
- Requirements: Graduates of High Schools not accredited must take C Grammar, or pass a satisfactory examination.
- Text Books: Maxwell's School Grammar. Structure of the English Sentence—Kimball. English Grammar—Baskervill and Sewell.

The courses in grammar presuppose a foundation in language work. For those who are deficient in the simpler grammatical requirements there is offered a preparatory course, A Grammar. This deals with the parts of speech and their common uses and with the simpler sentence forms.

Page 64

SCHOOL

In B Grammar a careful study is made of the uses and inflections of the parts of speech, including such forms as the infinitive and the participle. Frequent analysis of sentences is also given.

C Grammar deals with syntax. Much practice is given in the writing and the analysis of sentences, and especial attention is paid to sentence structure and to the agreement and government of words.

A thorough review of grammar is given in the Senior year. The study is considered in the light of all previous work, in both English and the other languages. Suggestions as to methods of teaching grammar are given.

FOUR YEARS' COURSE.

1. In the first year the work in Grammar should be of the usual academic character, familiarizing the student with parsing, analysis, and practical use of correct syntax.

2. In the fourth year attention should be given more largely to the grammatical structure of selected sentences, and to the historical phases of English Grammar.

Composition.—The chief aim in the beginning of the course is to overcome the restraint that the student feels in translating his own thoughts and feelings into words. Later we work for accuracy and effectiveness in expression. These are secured by imitation of the best models, and by cultivating the student's taste and his appreciation for the best literature.

A. Short themes in description, narration and exposition, with special study of the paragraph, of sentence structure and of figures of speech.

Readings: The Vision of Sir Launfal.

English 1 Short themes and longer monthly themes giving practice in the four forms of discourse. Conciseness and effectiveness will be the special aims of this course and the following one.

English II. A study of the nature of rhetorical principles as common sense rules which apply to other

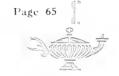

arts as well as writing; the preparation of briefs, and of themes on abstract subjects.

Reading: Selections from English and American Classics will be used in English I, and II.

FOUR YEAR'S COURSE

This work should aim at making the learner familiar with the subject as given in a standard text in Rhetoric; at establishing within the learner the power (and then the habit) of embodying these principles in his own composition work; and at familiarizing him with literary classics which illustrate the various types of composition.

LITERATURE.—An attempt is made to give by leeture, outline, and recitation the different periods of English and American Literature, the limits and leading characteristics of each period, with the most im-

portant details of the personal life of representative writers. The intimate connection of literature with the social, political and intellectual life of the nation of which it is the product and expression is kept in mind. The aim of our brief course is not chiefly to supply the student with knowledge, but, also, to refine his thought and feeling, to create a taste and enthusiasm for reading, and to leave him with a love for the best things, and with some knowledge of principles by which he can determine what is best.

In connection with the lives of their authors there is a careful reading of many individual Poems- Goldsmith, Burns, Coleridge, Wordsworth, Byron, Tennyson, -of Essays, Novels, Orations,—and at least one of Shakespeare's Dramas.

Students preparing for college cover the work pre-

scribed for college entrance, comprising the careful study of five Classics and the reading of ten others.

Required for Study and Practice: (1912)

Shakespeare's Macbeth.

Milton's L'Allegro, II Penseroso, Comus, or Tennyson's Gareth and Lynette, Lancelot and Elaine, and The Passing of Arthur.

Burke's Speech on Conciliation, or Washington's Farewell Address and Webster's First Bunker Hill Oration.

Macaulay's Life of Johnson, or Carlyle's Essay on Burns.

Required for Reading and Practice:

Śliakespeare's As You Like It.

Shakespeare's Henry V.

Franklin's Autobiography.

Chaucer's Prologue.

Gaskell's Cranford.

Hawthorne's House of Seven Gables.

Carlyle's The Hero as Poet, The Hero as Man of Letters, and The Hero as King.

Coleridge's Rime of the Ancient Mariner.

Tennyson's Princess.

FOUR YEARS' COURSE

As a foundation to an appreciation of the field of English and American Literature, enough time should be given to the History of Literature to enable the pupil to know the "periods" and the eminent literary lights of each.

Chief emphasis should be given to the study of the masterpieces themselves, presenting enough variety to make the learner familiar with the style of the authors given in the historic survey.

Logic. The English course is completed by a study of Argumentation, covering Brief-drawing and Argumentative Composition. The student is practiced in the processes of Argumentation by being set to work to exercise his reasoning power on familiar

material. The aim is to form in him the habit of looking at a subject in a purposeful way with a sense of the structure of the whole composition, to aid him in his development from the acquisition stage into reflective, modifying, originating power.

PENNSYIVANIA

FOUR YEARS' COURSE

As in Jevons & Hill, or Taylor, Atwater.

Expression.—The greatest thing in life is life itself the study of man, his character and works.

Expression is the manifestation of life, mind and soul in and through the body. It is necessary, then. that this natural medium that God has given us for the expression of ourselves, as well as the thoughts of others, should be cultivated and developed. The first object of this department is, therefore, to awaken the student; to free him from all constrained, limited, and erroneous habits of thought, action and voice; to open his avenues of expression and to give him a knowledge. and control of his agents of expression. We seek to make a well-disciplined physical organism the servant of a well-stored and cultivated mind.

The teacher, more than any other public worker. should have a free and intelligent voice and body, a voice and body that respond instantly to the expression of his thoughts and feelings.

It is the object of this department, in the second place, to enable the student to comprehend, appreciate, and communicate thought in the most natural and effective manner.

Aside from the regular class work done in this department, a large amount of public work is carried on through the Literary Societies of the school. The Society Contest, a very interesting and exciting feature, affords excellent opportunities for platform artists

to prove their ability. The plays given by the Societies each year are a very strong feature of this work, and through them much progress is made along the lines of Dramatic Art.

FOUR YEARS' COURSE

Reading and Public Speaking.

In the first year this work should consist chiefly in getting the ability to read the various types of literature in a clear, easy, and expressive manner. Attention should not be directed much to the rules of public speaking, but to the formation of the habit of plain reading.

In the fourth year the emphasis should be placed upon the rules of effective Public Speaking, and each member of the class should not have less than two formal appearances before an audience of more than just the membership of the class.

Department of History and Geography

Mr. Heckel Miss Walsh

UNITED STATES HISTORY.

Courses: Junior year, History I. History II.
Text Books: Essentials in American History—Hart.
HISTORY I.—History of the United States to the
War of 1812.

HISTORY II — History of the United States from the War of 1812 to the present time.

Requirements: Graduates of High Schools not accredited may enter History II. Non-graduates may enter History II after passing a satisfactory examination in History I.

The work in United States History extends through two terms in the Junior Year. The aim in this course is to familiarize the student with the development of the American nation, and to prepare him to teach American History in the grade schools. The inter-relation of Geography and History is carefully noted and the industrial, educational and social growth is studied along with the political and constitutional growth. The work is supplemented by as much research in the library as is possible in the time allotted to the subject. Some attention is given to current history, this part of the work being done by means of special topics.

ENGLISH HISTORY.—Senior elective.

Text Book: Essentials in English History—Walker. The chief interest in the study of the History of England is found in its constitutional aspect. The English constitution is a product of the slow growth of the English people through several centuries. It has furnished a model for the constitutions of many other nations. In order to be in complete harmony with his environment, it is necessary for the American of today to understand the origin and growth of our social and political institutions and tendencies. In teaching English History, special emphasis is put on the fact that our American civilization comes largely from English beginnings.

A syllabus containing outlines and readings is used as a guide in the course.

General History.—Two terms of the Middle Year.
History III.—Ancient History.

Text Book: Outlines of Ancient History—Morey. History IV.—Mediaval and Modern History.

Text Books: Essentials in Mediaval and Modern History—Harding. History of Western Eurone—Robinson.

This course is open to those who have completed American History. It affords the opportunity to look

upon history, as a whole, and a constant effort is made to impress the student with the continuity of the growth of mankind in civilization.

The aim in this department is not only to familiarize the student with historical facts, but also to develop the historical imagination. To accomplish this, constant reference is made to primary sources. A text book is used as the basis of study, but there is a considerable amount of prescribed collateral reading for every lesson. The student is required to draw maps frequently so that he may get a clear picture of those physical features that form the permanent framework by which he will later determine changing political boundaries and movements.

Civics.--Junior year.

Text Book: Rights and Duties of American Citizenship—Willoughby.

The student is given some knowledge of the nature of political authority. He is led to an understanding of citizenship and government in general, before taking up the study of our complex government. The rise of the nation is considered. A study of the history of the constitutional convention is made. A review of the text of the constitution, the meaning of the terms employed, together with the historical incidents to which they refer, are made prominent. The framework of the government—both National and State—is examined.

FOR THE FOUR-YEAR COURSE

Ancient and Mediaval.

 As much as is offered under this heading in Myers' General History.

Modern.

As much as is offered in Myers' General History under this heading.

United States.

3. As much as is offered in Morris, Channing or Elson, Mc-Laughlin.

SCHOOL

Civics.

 Present system of National and State government, historic development of American government, National and State constitution.

GEOGRAPHY.

Courses: 1st Geography. 2nd Geography.

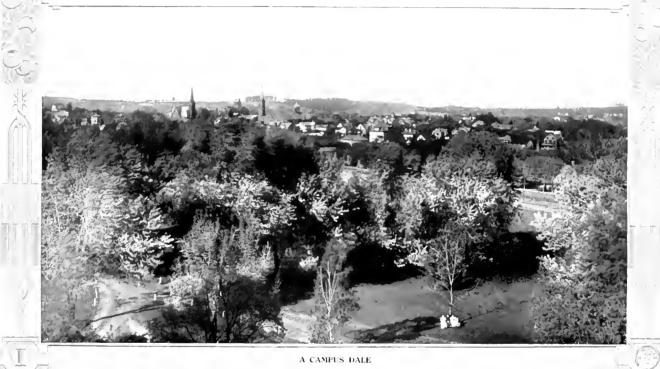

Text Books: Physical Geography—Dryer. Ad-

vanced Geography—Dodge.

Requirements: Graduates of High Schools not accredited may enter 2nd Geography, provided they have studied Physical Geography in their High School course. If not, they will enter 1st Geography or take Physical Geography by a special examination. Non-graduates may enter 2nd Geography, after passing a satisfactory examination in 1st Geography.

Page 70

Physical Geography.—The student takes up the study of Physical Geography in the first term's work. In pursuing this study, the fact is kept in mind that the majority of the students have as yet little if any knowledge of Physics, Chemistry, etc., and, therefore, no attempt is made to burden their minds with those features of the study which they cannot grasp and understand. Yet, though the causes of certain important facts may be complicated, as in the case with the atmospheric circulation; or unknown, as in the configuration of the continents and in the nolift and depression of the lands; and the consequences of other facts may be indirect or remote; nevertheless, these facts are so inherently physiographic, that they are treated as fully as the circumstances will permit, leaving the more complex features for the student's later comprehension. In all this work, attention is frequently directed to the association of human conditions with the environment by which they have been determined, in order to form in the student the habit of looking upon the physical features of the earth in their relation to the progress and development of mankind.

During this term, sufficient time is put on Mathematical Geography to give the pupil a clear grasp of the elementary phenomena connected therewith.

The study of the text is illumined by such field work as is possible, by the use of pictures, diagrams, maps, globes, and the apparatus at hand.

DESCRIPTIVE GEOGRAPHY.—This course embraces a complete study of local and general descriptive geography, together with a discussion of those methods best fitted for the use of the teacher in presenting the subject in the various grades. The work may be divided into two parts—the Academic and the Pedagogical.

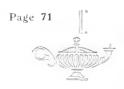

ACADEMIC WORK.—In this part of the work the aim is to ground the pupil thoroughly in the facts of

Gardener at Work

descriptive and political geography. The method pursued, in the main, is what is known as the tracing and topical method as laid down by the best writers on geography. Map-drawing is a constant feature of the work. The work is enriched, as much as possible, by pictures, specimens of various products of different countries, etc. Careful attention is paid to what might be called up-to-date geography, it being deemed worth while that the pupil should form the habit of keeping abreast of present geographical progress. The fact is kept constantly in mind that Geography and History should closely correlate, and, therefore, in the study of the former, the pupil's attention is called to many facts and features which will serve to throw light upon the study of the latter.

PEDAGOGICAL WORK,—It being deemed that the

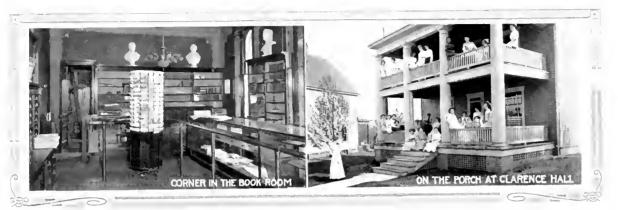

Page 73

class-work is, of itself, "a living example" of the best methods to use in presenting advanced geography, the time alloted to this branch of the work is given over to a study of the best method of teaching geography in the lower grades.

When and how to begin the subject, how best to teach the fundamental ideas of direction, distance, etc., value of map-drawing, the sand-table and other features of the work are taken up, studied and discussed. A "working outline" for actual use in the school room is supposed to be one of the fruits of this course. This work will be presented to the class through dictation and discussion.

A fine set of wall maps, a globe, sand-table, charts and other accessories are at the command of the teacher of this subject.

Geotocay. In Political Geography we have studied the earth with regard to man's activities upon it cities, farms, factories; in Physical Geography we have considered the earth as the home of man, and learned of its surface preparation for man's use; in Geology we go deeper, and study the origin of the world, its varying forms, and its gradual evolution from primeval fire-mist to a stable foundation for man's multitudinous labors and investigations.

Science and Revelation unite in declaring the world to have been at first "without form, and void;" then that there gradually appeared the waters; then, above these, lands arose to view; later came elementary lifeforms of plant and of animal life; finally, when all was ready, man, the master, entered upon his inheritance

We first consider Geology physiographically, and review our Physical Geography study; then comes Lithological Geology, the examination of rocks and minerals and soils, their condition, structure, and arrangement; next Dynamical Geology, treating of the causes of geological events, of the forces which produce earth changes,—atmosphere, heat, water, life, etc.; finally,

Historical Geology, when earth's pages have been scanned to learn of the successive time-stages when rock layers were laid, and plants, animals and man appeared.

FOR THE FOUR-YEAR COURSE

GEOGRAPHY.

Physical.

A course equivalent to that given in rextbook like Gilbert and Brigham; Introduction to Physical Geography, emphasizing the following points.

- I. Heating and motions of the earth, with effects,
- Atmosphere and weather.
- 3. Land, agents at work and leading forms,
- 4 Shore forms.
- 5. Field work.

Political. - Third year work to include

- 1. History of geography
- 2. Review of facts.
- Field work.
- 4. Maps and map drawing.
- 5. Topographical U.S. Maps.

GEOLOGY.

- 1. Physiography.
- 2. Minerals and rocks.
- 3. History Geology
- 4 Field work with notes, e. g. Brigham.

Department of Greek and Latin

Mr. Jack Miss Weaver Mr. Foreman

The number of students preparing for college has steadily increased during the last few years. Vassar, Mt. Holyoke, Lafayette, Washington and Jefferson, Westminster, State and other colleges, receive students upon our certificate.

LATIN. The "Roman" pronunciation is used.

In the Junior year three terms are spent on Smiley and Storke's Beginners' Latin Book.

It is here the aim thoroughly to ground the student in the Latin forms and inflections, and in the general principles of Latin syntax. It is desired that the student have a good knowledge of English before taking up this branch, since the idioms of the two languages are constantly compared.

In the Middle year three terms are devoted to Books I, II, and III of Cæsar. Here, in addition to the literal and free translation of the text, there is

Main Hall in the Smith Mansion

constant drill in the use and force of the cases, the modes and tenses, of the principles of indirect discourse, of the gerund and gerundive constructions, of the ablative absolute, in the derivation of words, and in the analysis of sentences. Some time is spent in a careful study of Cæsar's life and of the Roman life of his time.

PENNSYLVANIA

The Senior year continues with one term on Cicero's

orations (First three against Catiline), and two terms on Virgil's Encid (Books 1-111), In connection, Latin composition is studied.

In reading poetry, sufficient attention is paid to the laws of versification to enable the student to scan the poetry he reads.

For those who desire to take it, a year of advanced work is given. During this year the work covers three orations of Cicero (IV against Catiline. Archias and Manilian Law), and Virgil's Æneid (Books IV-VI). In the spring term there is offered an additional course in Latin Prose Composition.

Preparatory students are given any additional course required by the institution to which entrance is sought.

Greek, -- It is the aim not only to implant a thorough knowledge of the forms and principles of syntax,

but also, by means of reading at sight and other exercises, to enable the student to use the language in a practical way. In this way the student comes to look upon Greek not as a "dead" language, made up of a mass of forms and rules, but as a legacy of a cultured people.

The reading of the Greek authors includes Xenophon's Anabasis and Homer's Hiad. If desired,

other authors may be studied. In connection with these, the history and customs of the Greek people are taken up. Exercises in writing Greek are kept up by the use of Pearson's Greek Prose Composition.

Preparatory students are given the amount of Latin and Greek required by the institution to which entrance is sought.

For the Four-Year Course

LATIN.

First Year,

 Elements of Grammar and vocabulary of at least 500 words—thorough preparation to read Casar.

Second Year,

Three books of Cæsar, and equivalent for the fourth, with close attention to Grammar and Roman history of the periods.

Third Year.

 Cicero; six orations, including Manilian Law, with special attention to composition and English derivatives.

Fourth Year.

Virgil, six books; composition; special attention to mythology and poetic forms.

Department of Modern Languages

MISS SHERRILL MR. KIRBERGER MISS ROTHERMEL

It is the aim of this department not only to give the student a thorough drill in forms and inflections, but also to enable him to make practical use of the spoken and written language.

German.—In the first year special emphasis is laid upon pronunciation, the inflection of the noun and adjective, the conjugation of strong and weak verbs, the use of the model auxiliary, the principles of word-order; some time is given to easy German conversation based upon the selections read. First year German may be used as a substitution in Middle year only.

Texts: Vos' Elements of German, Bacon's Im-Vaterland, Storm's Immensec, Heyse's L'Arrabbiata.

The second year is devoted to composition, Advanced Grammar and Syntax, copious reading and a

critical study of German authors, including a few lyrics, and to German conversation based upon the works read. Second year German, as well as second year French, may be used as a substitute in the Senior year only.

Texts: Joynes-Meissner's Grammar; Wesselhoeft's German Composition; Moser's Der Bibliothekar; Schiller's Jungfrau von Orleans; Goethe's Hermann und Dorothea.

Opportunity is given for continuing German a third year. During this year such books as Wildenbruch's Das Elde Blut; Richl's Der Fluch der Schoenheit; Schiller's Wilhelm Tell; Goethe's Egmont, and

Schiller's Maria Stuart are read. Composition work based on Baumbach's Der Schwiegersohn, and similar texts, is given.

French, — Special stress is laid upon pronunciation, idiom, the inflection of the verb, and the essential principles of syntax. Much time is given to reading in French, translations at sight and to practice in conversation. First-year French may be used as a substitution in Middle year only.

Texts: Béziat de Bordes' Elements of French; Super's French Reader; Labiche's La Grammaire; About's La Mère de la Marquise. Either French or German, if substituted in the Senior year, must be begun in the Middle year.

In the Second year, Mérimée's Colomba, Dumas' Le Comte de Monte-Cristo, La Question D'Argent by Dumas fils, and Lazare's Elementary French Composition are used.

Four-Year Course

GERMAN.

First year.

Elements of grammar, e. g. Vos' Llements of German.

- L. Conversation on familiar subjects and incidents.
- 2. Composition.
- 3. Memory work, "choice, simple poems,
- Reading Maerchen and Erzaehlungen; stress on oral translation and about 40 pages of simple German, e.g. Im Vaterland, or Immensee.

Second year.

- 1. Grammar.
- Composition, and reading and translation, William Tell, and Die Jungfrau von Orleans, or equivalent.

French

The two years' work in French is the same as that outlined in the three-year course.

Department of Mathematics

Mr. Smith Miss Chesebrough Mr. Gordon Miss Winters

ARITHMETIC.—The work in arithmetic is designed to prepare the student for subsequent work in mathematics or for teaching in the public schools. It also gives him a practical knowledge of the subject and prepares him for business life. The subject is made clear through the use of concrete and practical problems.

The subject of Arithmetic is covered in three terms and the work is approximately as follows:

1st Term.—Practical problems, greatest common divisor and least common multiple, common and decimal fractions, denominate numbers and measurements, analysis, longitude and time.

2d Term.—Percentage and applications, square and cube root.

3d Term. Subject reviewed and completed.

Senior Year. - Review and preparation for State Board Examinations.

ALGEBRA.—The object of this course in Algebra is to give the student a thorough knowledge of the principles of elementary Algebra and much work in practical applications thereof. This thoroughness of the course is desirable both for the students who expect to teach in the public schools and for those desiring to do advanced work. The work is planned to assist the student in his further study of mathematics and the study of the physical sciences. The culture value of Algebra is recognized and the student is led to realize the beauties of the subject.

Algebra is a three-term subject, and the work is approximately as follows:

1st Term.—Fundamental operations, equations, and factoring.

2d Term.—Fractions, simultaneous equations, practical problems, involution and evolution.

3d Term.—Theory of indices, radicals, quadratic equations, practical problems, imaginaries, and progressions.

All students are required to take the work in Algebra except those who can furnish evidence that they have already satisfactorily done the work. A new class in Algebra is organized every term.

Geometry.—The required work in Geometry covers the ground outlined in Wentworth's Plane Geometry. Solid Geometry, which is given in the Senior year, is based on Wentworth's Solid Geometry.

The body of geometrical truth is an organized structure, the careful study of which has ever been a stimulus and a discipline to those who have pursued it. The prospective teacher receives a training which is essential in his work as a teacher and in the pursuit of scientific studies. Among the mental and moral qualities which it is the aim of this course to develop are the following: Initiative, self-reliance,

PENNSYLVANIA

and the ability to cope with a new situation. The study of Geometry develops the habit of accurate reasoning, the habit of looking confidently for the solution of every problem, including those of everyday life, of discriminating between the essential features of a problem and those which are not essential.

After a thorough study of the demonstrations of the author, the student takes up the demonstrations of the original exercises. These he is able, with a few suggestions, to deal with; this gives him self-reliance and power and he proceeds confidently and accurately. Such a course as this gives the student a mind trained to meet the problems which confront the teacher.

TRIGONOMETRY AND SURVEYING. One term is

devoted to Trigonometry and one to Surveying. The Trigonometry is Plane Trigonometry. The work includes the study and use of logarithms, sufficient study of the triangle to prepare for Surveying, the development of the tormulas, and practical applications.

The term devoted to Surveying involves the study of the theory of Surveying, but the greater part of

the work is actual practice in the field with surveyor's instruments. The students, after some elementary work, run boundary lines, keep notes of all work, and then reduce their observations.

HIGHER MATHEMATICS.—Any one desiring may elect courses in College Algebra, Analytic Geometry, and Calculus.

For the Four-Year Course

Algebra.

First year.

- 1. Review of fundamental operations including factoring .
- 2. Fractions, including ratio and simple proportion. 3. Simple equations with a study of graphs.
- 4. Involution and evolution.
- 5. Quadratic equations.
- Radical equations.
- 7. Theory of exponents. 8. Binomial theorems.
- Practical problems.

In order to complete this work in a year, the student should have had a full year's work in algebra before entering. Quickness and accuracy of thought are predominant aims in the work.

Arithmetic.

First year.

- 1. Drill in the fundamental operations with integers, decimals and fractions.
- 2. Denominate numbers, omitting tables that are not in common use.
- 3. Mensuration and surfaces.
- 4. Percentage and its application.
- 5. Interest, including discount.6. Ratio and simple proportion.
- 7. Involution and evolution.
- 8. Drawing plans, plots, and maps to scale.
- 9. Metric system.
- 10. Practical problems of all kinds.
- 11. Frequent reviews and drills.

Fourth year.

- 1. Intensive study of arithmetical principles involved in the fundamental operations in integers, fractions, and decimals.
- 2. Practical mensuration.
- 3. Miscellaneous problems.
- 4. Drills demanding alertness and accuracy.
- 5. Oral work.
- 6. Emphasize the importance of good English in all solu-
- 7. Metric system.
- 8. Study of banking, stock market, money, and other sources of arithmetical problems.

- 7. Plotting, blue prints, copying, etc.

Department of Science

Mr. Hickman Mr. IAMES Mr. Walte

It is the object of this department to secure to the pupil the distinctive advantages which result from correct science study. These we believe to be the power to observe quickly, clearly and comprehensively, and the ability to deduce legitimate conclusions from the observations thus made. With these ends in view, it is the aim rarely to tell the pupil what he can find out for himself by observation or experiment.

The whole department is now in new quarters designed especially for this kind of work. The laboratories are completely equipped with up-to-date laboratory furniture. Much new apparatus has been added to both the Physical and Chemical laboratories, greatly increasing the value of the work done in this department.

BOTANY.—In the study of Botany an amount of text-book work sufficient to acquire the necessary technical terms and fundamental principles is required. But the greater part of the work consists in a close study of the types of the most important orders. Special attention is paid to structure and function as af-

fected by environment, and to the inter-relations of the animal and plant worlds.

Large tables have been placed in the classroom where the pupils may perform their dissection and analysis under the guidance of the instructor. The student is required to collect, analyze, classify and mount a number of specimens of local flora.

Note-books are used in which the student keeps a faithful record of his observations and deductions.

ZOOLOGY.—This biological subject is studied in much the same manner as Botany—recitation from text book; individual laboratory work, taking up the larger type forms; and field work.

Each student makes his own dissections, keeps a faithful record of actual observations in note-books, and mounts specimens collected from excursions in the vicinity. He is taught to infer habit from structure, and see life relationships, and the economic value of our fauna.

A well-lighted laboratory, special tables, large tank for living material, aquariums for observing the early development of certain familiar animals, a cabinet of mounted specimens— all contribute to an interest and efficiency in the subject.

Physics.—The course in Physics extends through the Fall and Winter terms of the Senior year. All divisions of the subject are covered except Magnetism and Electricity, which is continued in the spring term, as elective work. The aim is to cultivate a keen understanding and appreciation of common natural phenomena, and a deep sympathy for what is scientific in a scientific age.

The method used is to combine recitations with as much individual laboratory work as possible. Class demonstrations and practical problems in the different topics supplement and fix the theory. At least twenty-five experiments illustrative of fundamental principles are required. The experiments are performed

PENNSYLVANIA

The large and well-lighted laboratory has been planned and built along modern lines, and is equipped throughout with new laboratory furniture and apparatus. The tables are provided with uprights and adjustable bars; and the apparatus comprises many costly pieces, while others, though verifying fundamental laws, are yet so simple as to be easily duplicated by our graduates in schools lacking facilities, and in their teaching of Elementary Science and Nature Study.

Students taking the full year's work are admitted on certificate and the presentation of the note-books to our leading colleges.

Human Physiology.—The study of physiology comprises one term's work in the Junior year. This being the first science work which our students take up, it serves as an introduction to scientific methods of thinking and feeling. Our students have seen few scientific experiments performed and have performed still fewer themselves. The method of teaching to which they have been accustomed is the didactic. These facts largely govern the mode of presentation. So far as the size of the class and the time available permits, the students perform the experiments themselves and draw their own conclusions. Here they are led to depend on their own eyes and fingers.

Rather more attention is devoted to the Chemistry of Physiology and to the subject of Hygiene than to Anatomy. In the lectures and talks by the instructor to the students, the attention of the latter is drawn to the experiences of the race in the matter of food. drink, and raiment; and they are led to attach importance to the lessons which the race has learned in these matters. In all the work the cheerful sides of Physiology and Hygiene are emphasized and the morbid sides kept in the background.

CHEMISTRY.—The required work in Chemistry covers a period of two terms. The student begins the study of this science in the Middle year, after completing such study of Physiology and Elementary Mathematics as may have served to introduce him to the principles of scientific thinking, preparing his mind for the reception of the more complex ideas involved. The course offered covers the field of General Chemistry, about the work given in Remsen's "Elements of Chemistry," Revised Edition. Recitation work is supplemented by lectures by the instructor on the more abstract parts of the subject discussed in the text. These lectures, or talks, enable the instructor to keep in touch with the student's progress and to lead him into the subject as the best text is not able to do. Regular hours are assigned for laboratory work and the student's note book is written up and examined. The

Page 86

laboratory is newly furnished and supplied with modern conveniences. Each student is supplied with a desk and the necessary apparatus to pursue his studies.

The aim of this course is to give the student some concept of the large part which Chemistry is playing in our industrial and social life, to impress on the student the value of the subject in bringing us in touch with the world's work in many fields, and to enable him to see the esthetic side of scientific truths. The fundamental character of Chemistry in Nature Study is made clear, and experiments are selected to aid him in teaching that subject. That Chemistry is a rapidly developing subject is kept in view, and references cursorily had to the progress making.

Supplementing the work in General Chemistry, is offered an elective course in Qualitative Analysis of unknown solutions of metallic salts, this work being continued until the student has mastered the methods employed for the detection of the Metallic Groups. The course is completed by analysis of dry salts, the methods of detecting non-metallic elements being best made clear by this means.

The work in Chemistry is concluded by a course in Quantitative Analysis, during which analyses of less complex rocks, alloys and ores follow quantitative determinations of simple salts by Gravimetric methods. This course should be preceded by instruction in the Elements of Physics.

A student who has completed the work offered should be able to step into the field of Practical Chemistry, and some of our graduates now hold valuable positions in this line.

The courses in this department comply with the entrance requirements of Wellesley, Smith, Princeton and other colleges. Many of our graduates are teaching Science subjects in high schools, while others hold good positions with industrial corporations.

FOR THE FOUR-YEAR COURSE

BOTANY.

- 1. Purpose and differences among plants.
- 2. Methods of reproduction.
- 3. Plant food and plant physiology.

 1. Division of labor and functions.
- 5. Growth.
- 6. Movement and response to stimuli.
- 7. Seed, fruit, and domestication.
- 8. Ecology.
- 9. Practical application of Botany.
- Analysis and classification of plants.
- 11. Plant pathology.

Zoology.

- 1. Plant and Animal-Relations.
- 2. Study of animal types.
- 3. Periods in life of animal.
- 4. Social instincts and habits.
- 5. Reproduction.
- 6. Birds.
- 7. Insects, including economic entomology.
- 8. Evolution.
- 9. Laboratory and field work

Physics.

Purposes.

- 1 To give the student a clear knowledge of the elementary principles of physics as applied to practical life.
- To store the mind of the student with the great fundamental truths and laws of physical science.
- To develop in the student the power to manipulate apparatus in the performance of experiments.
- 4. Study to be based on laboratory work.

Courses.

- 1 Properties of matter.
- 2. Mechanics of solids, liquids and gases.
- 3. Forces of heat, magnetism and electricity, sound and light

Physiology.

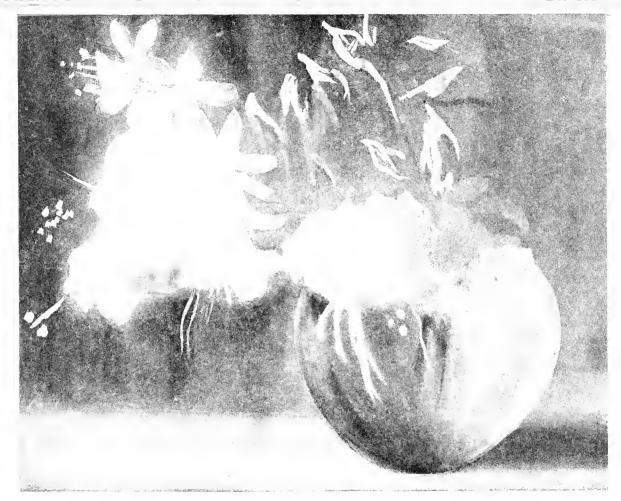

Shall present the subjects:

- Anatomy,
 Physiology.
- Physiology,
 Hygiene,
 - Physical welfare of school children, civic obligations as regards health of individual.

CHEMISTRY.

- 1. Structure of matter.
- 2. Elements and compounds.
- 3. Study of the common elements.
- 4. Chemical laws.
- Chemical theories.
- 6. Chemical mathematics,
- 7. Study of common compounds.
- 8. Chemical reactions.
- 9. Application of chemistry.
- 10. At least 40 periods of laboratory work.

Department of Drawing

A SKETCHING CLASS ON THE CAMPUS

Department of Drawing

Miss McElhaney

Miss Taylor

"As we increase the range of what we see, we increase the richness of what we can imagine."

"So far as education does indeed tend to make the senses delicate, and the perceptions accurate, and thus enables people to be pleased with quiet instead of gaudy color, and with graceful instead of coarse form; and, by long acquaintance with the best things, to discern quickly what is fine from what is common—so far acquired taste is an honorable faculty, and it is true praise of anything to say, it is 'in good taste.'

ELEMENTARY DRAWING. (Two terms.)—These classes are required in the Elementary Normal Course and are designed to meet the needs of all teachers in the public schools. This includes elementary principles of type forms, light and shade, form and color, modern free-hand perspective, lettering, design, study of artists, nature work, landscape, constructive work, methods, care of materials, and development of type lessons, with analysis of the same.

Supervisors' Course, (Six terms.)—

"Turn, turn my wheel! This earthen jar A touch can make, a touch can mar: And shall it to the potter say: What makest thou? Thou hast no hand? As men who think to understand. A world by their Creator planned, Who wiser is than they."

This course is for those students who desire to fit themselves for teaching in better positions, in the city schools, where more preparation and skill are required than can be secured in the above course; for those who wish to become special teachers of drawing; and for those who wish to prepare for entrance to professional training schools.

The work requires from five to eight periods a day, and includes six terms of Advanced Drawing in addition to the following.

Paper folding, Construction work, Modeling, Weaving,

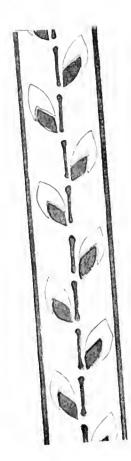

Bead work, Wood-block printing, Lettering,

Illuminating.

Development of a Course of Study in Drawing

Methods, observation, and practice in teaching, under strict supervision and criticism.

History of Art,

Mechanical Drawing,

Pedagogy and English of the Middle and Senior years of the regular Normal Course.

There are demands for graduates who can teach and supervise both Drawing and Music in the public schools.

ADVANCED DRAWING. (Six terms.)—"Without peace and pleasurableness in occupation, no design."

Recognizing that the study of art should be broad and comprehensive, this opportunity is given to students as a means of supplementing the work of the former courses, as well as a means of culture and a training that shall lead to fitness in the choice of life work. The work is along the same lines as the Elementary Course and includes such work as may be given in the better high schools and some technical schools. The following is a brief outline:

Nature drawing,
Illustrative drawing,
Figure and animal drawing,
Historic ornament,
Composition.

Landscape,
Still life,
Still life,
Printing,

Leather Work. Tooled and illuminated.

Outdoor sketching in pencil, charcoal and water color.

Although the course covers six terms, students having completed the Elementary Course may enter the class at the beginning of any term.

In this course the student is given opportunity for practical application of his skill. He is required to prepare commercial drawings, such as designs for books and magazine covers, decorations, borders, head and tail pieces.

Department of Manual Training Mr. Jackson

PENNSYLVANIA

Manual training is not, as some suppose, a study of the elements of certain trades; but a good course in manual training is invaluable as a preparation for any trade or profession. The object of the student in Manual Training is not so much to learn how to perform certain operations as it is to think and modify knowledge from any source and adapt and apply it to the work in hand in a practical and efficient manner. It is only those who can apply this knowledge thus that have received a satisfactory educational training, and the demand for this class of people as teachers and in all other lines of activity is greater than the supply.

The state requirement in Manual Training in the regular normal course is one term. This term of work is devoted to the construction of such objects as will give the student a broad knowledge of the principles involved in wood construction and finishing. Each student is furnished with a blue print of the object to be constructed, thus correlating by application his Mechanical Drawing and Manual Training. After having satisfactorily completed the prescribed course of study, students are allowed to construct one larger article of furniture, such as a table, a tabouret, a magazine rack, a music cabinet, etc., particular attention being given to the manner of original design and workmanship in construction and finishing. The educational value of Manual Training is kept constantly in mind as the chief end and aim of the subject.

Knife work, basketry, clay modeling, wood carving and other light forms of work are provided as a substitute for bench work whenever this seems best.

FOUR-YEAR COURSE

Wood Working, Basketry, and Clay Modeling.

On One of the Tennis Courls

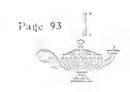

Department of Physical Training Miss

Three terms of this work are required. During the winter term, all of the young women living in the dormitory are required to take Physical Training.

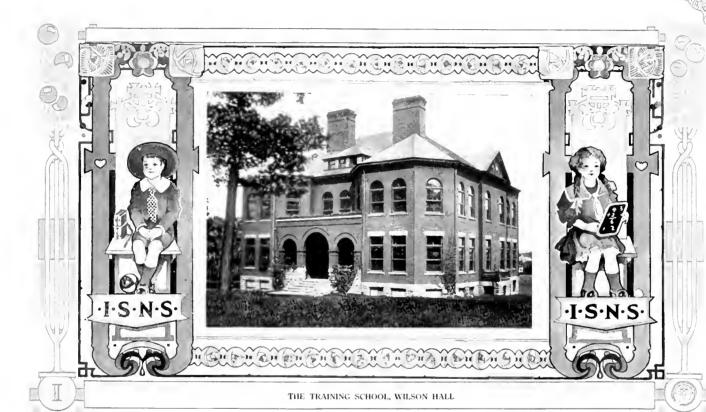

The aim of this department is three-fold: educational, hygienic, recreative. The course is outlined to prepare students to teach this subject in public schools.

The work consists of indoor and outdoor exercise. Indoor work includes running, military tactics, drills with hand apparatus, esthetic and folk dancing, gymnastic games and basketball. Hockey, basket-ball, tennis and field athletics are enjoyed on the campus.

The basketball team is a feature of this department. They play a number of games with other schools during the season. The girls composing this team, for the past year, were the undisputed champions in Western Pennsylvania in schools of our class.

Scope and Function of the Training School

The training department consists of a school of about two hundred fifty students. These are carefully divided into eight grades corresponding to the grades of the most approved elementary schools of the country, and an advanced or subnormal class composed of those who have completed the regular Model School Course and are prepared to take up some of the branches included in the prescribed work of the lunior year.

The regular work of the school is systematically supervised by trained and experienced critic teachers. They are responsible for the progress of the children and the training of the pupil teachers. The special work in music, drawing and manual training is under the direction and control of specialists in these branches.

Wilson Hall, a modern building and one of the most attractive on the campus, is given over entirely to the use of this department. It is commodious, conveniently located, and is well equipped for the purpose which it fills.

All the work of the pedagogical department centers in the training school. Its purpose is to afford the

members of the Senior class an opportunity to put into practice the principles of education which have been emphasized throughout the entire course, to send them out with a very practical knowledge of the theory and art of teaching, and with the confidence and judgment which arise from actual experience in the schoolroom.

To this end each candidate for graduation is required. to teach at least two terms satisfactorily in the Model School. The work is so arranged that experience is gained in both the primary and grammar departments.

Students begin their observation and practice work in the Senior year. A class numbering from fifteen to twenty children is assigned to each for a period of twelve or fifteen weeks. The Seniors then report to the critic teacher to whose department their work

belongs. Instructions are given with regard to the general management of the class, the work to be covered, use and care of materials, methods to be employed, hours for criticism, and the various duties incidental to the actual teaching.

The pupil teachers are required to write out plans for the daily lesson. These plans are submitted to the critic teachers and are carefully examined and corrected the day before the lesson is presented. They are written in accordance with the following outline:

*I. Aims. II. Illustrative Material.

a General. 111. Basis.

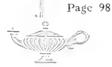

IV. Subject Matter-Method. b Special.

The plans should show most clearly that the teacher understands the child, his interests, capacity and limitations. They should show that she understands the subject to be taught and the end and aim in presenting it. They should indicate that she is acquainted with the child's past experience and properly appreciates his fund of ideas. Fertility in illustration and device. skill in questioning and thoroughness in drill should mark both plan and presentation.

Seniors who are teaching are required to meet their critic teacher for general criticism one period a week. In this criticism class, general topics relative to the work are discussed, general mistakes are noted, reading along professional lines is assigned, and the various problems of the schoolroom are talked over.

In addition to the criticism class, appointments are made for individual criticism, the critic teachers reserving Saturday afternoons and the hours between 3.30 and 4.30 each day for this purpose. At these times, criticism may be more pointed and personal. The endeavor will be to establish such a relation between the pupil-teacher and the critic that errors and

*See McMurry's "Method of Recitation."

faults may be discussed most freely and without any misunderstanding as to motive. It is, however, as much the duty and desire of the critic teacher to discover and develop latent power and ability as to note and correct faults in personality and pedagogy.

PENNSYLVANIA

Although the nature and amount of the work to be discussed will necessarily be indicated by the supervisor in accordance with the outline of the course of study, the pupil teacher is thrown on her own responsibility in determining the order of the topics, the amount to be presented in the recitation period and the best method of development and application. She is encouraged to be independent and original. The pupil teacher is encouraged to ask advice freely and talk over, outside of class, the difficulties and problems that perplex her, but she will gain strength by relying upon her own power and discretion in the class room. Very rarely should she make any appeal to the critic teacher in the presence of the children.

Illustrative lessons are given frequently by the critic teacher. These are observed closely by the Seniors, who should be prepared to take part in a discussion concerning them in the criticism period.

In directing the special work of the school, such as the observance of Thanksgiving, Christmas, Washington's Birthday and Arbor Day, the Seniors are expected to take active part when called upon. Training along this line is invaluable.

Reading and Literature

The general aim in the subject is to give the child the power to interpret the written or printed symbols by which thought is conveyed, to arouse an appreciation of what is best in literature, to awaken the desire to read, and to train him to give out the ideas thus

obtained with correctness, clearness, and the right kind and degree of feeling. A proper conception of the aim of instruction in this branch determines the method to be employed and the material to be used.

In the lower grades the teacher must of necessity concern herself to a very great extent with the mechanics of reading, the problem of teaching the children to recognize words in groups. To this end a combination of the word, sentence and phonic method is used, the sentence being regarded as the unit of thought. Phonics are introduced gradually, chiefly as a means of making the child independent in mastering new words, and in affording exercises in correct enunciation.

The first reading lessons are based largely upon nature study and upon the poems and stories used in

the language lessons. They are chiefly the expression of the child's thought along these lines.

Nursery rhymes, fairy tales, stories of adventure, Greek, Roman and Norse myths, English and American history stories, and the best poetry that the field of literature affords, are the sources from which materials are drawn throughout the course.

It is not enough that the children pronounce the

words correctly and with ease; they must comprehend the thought, they must feel its force and significance, they must enter into the life and ideals of the great minds of the world. With them they must dream—with them they must create.

The selection of material to be used in the various grades is made with care, in order that it may be suited to the interests and capacity of the children, and to the other studies which they pursue, No attempt is made to force upon them literature which is entirely beyond their ability to understand and enjoy. Their development in taste and power to interpret is natural in all senses of the word. Every selection used is elevating in its influence and has in it something which appeals especially to the nature of the particular children to whom it is presented.

The children are encouraged to read outside of school. Books, papers and magazines are provided for their use. Quite a broad course of supplementary reading is planned for each grade, and special periods are set aside in which the teacher reads to the children stories and poems which are profitable and interesting.

In oral reading care is taken to see that the children speak clearly, in a pure tone and pleasing manner.

Page 100

Language

PENNSYLVANIA

Only through an exercise of the power of expression which the child already possesses will be gain additional power in the correct and pleasing use of his mother tongue, and in the world, social and commercial, perhaps no faculty contributes more than this to success.

The first step in developing expression is to arouse thought and awaken ideas. To this end all the subjects of the school curriculum may be employed and all of the occupations and activities of the schoolroom and playground should be made to contribute. The entire world of childish experience and knowledge may be drawn upon for the materials for language training.

It is, however, through long sustained effort and practice under "never ceasing watch and correction" that the art of correct speaking and writing is obtained. It is the duty of the school to afford this practice and to exercise this surveillance in order that there may be a development of the power to speak without effort and with freedom from grammatical errors, popular slang, and the crude provin-

cialisms to which the average American is prone. For the reason that oral speech is used to the greatest extent, oral language training should predominate. Every teacher in every recitation will prove herself an efficient ally of the language teacher if she will insist upon good English in response to every question asked. The result will be manifest in the formation of right habits of speech. In fact, this is an imperative condition to the accomplishment of the aim of the school in this direction.

The course of study indicates the general character of the work. The lessons may be divided into three

classes-conversational, formal and written. In the seventh year the study of English grammar is begun.

In the conversation lessons the pupils are required to reproduce stories which they have heard or read, to describe places which they have visited, to narrate, adventures in which they have taken part, or to enter into discussion or debate on some question of interest to them as individuals or as a school. The impromptu dramatization of stories leads to a vigorous style and is a splendid means of arousing the imagination and increasing the child's vocabulary.

The written exercises are frequent but short. A child loses interest and zest if he is required to write too much. He becomes fatigued and as a result does careless work, thus defeating the purpose of the lesson. Nearly all written exercises are done in school under the watchful eye of the teacher. In the lower grades sentence work only is required; gradually the pupils gain the power to reproduce the stories of the reading and literature lessons, and to write up the accounts of the imaginary journeys in geography. They keep a journal, a weather record, a notebook for their observations in nature study and their themes in history. Finally they arrive at the stage of original composition. No slovenly work is accepted. Little re-writing is permitted. The first draft must represent the best effort of which the pupil is capable.

Formal language lessons are few in number. Under this head the dictates of custom in punctuation, capitalization and sentence structure may be considered.

Although the study of grammar is deferred until the seventh year, the more common grammatical terms may be used freely as occasion requires much earlier in the course.

Nature Study

The work in Nature Study is based on the child's observation and experience. All reading that is done in connection with this subject follows, not precedes, original investigation,

The materials are the every day natural surroundings of the child, seen so far as possible in their natural environment. In determining the order of subjects and the methods followed, the teacher should be guided very largely by the season of the year and the stage of the development of the pupil.

The purpose of Nature Study may be stated briefly as follows:

It develops the perceptive faculties, strengthens the imagination and develops the reflective powers.

It aims to cultivate the esthetic sense.

It gives "an insight into the laws of Nature and teaches the child to make use of these laws in answering his reasonable needs."

It inculcates moral and spiritual lessons, leading to greater sympathy, kindliness and consideration.

Geography

"Geography is the study of the earth as the home of man." In presenting the subject the teacher should choose topics which will lead the pupil to see how races and people have been affected by natural environment, and how natural conditions have been and may be changed and modified to best serve the interests of mankind.

The method chosen should be one calculated to develop the power of reasoning from cause to effect, the ability to see relations, and the faculty of correct judgment. In this subject, as perhaps in no other, is

there an opportunity to add to knowledge, to give breadth of thought, a wider experience, greater tolerance and liberality, and therefore a more profound culture.

History

The outline which follows later indicates the scope of the work in this subject. The presentation should be original, broad and vigorous. The great lessons drawn from a consideration of the records of past events should find expression in the life and conduct of the citizens of the future. "It is the aim of history

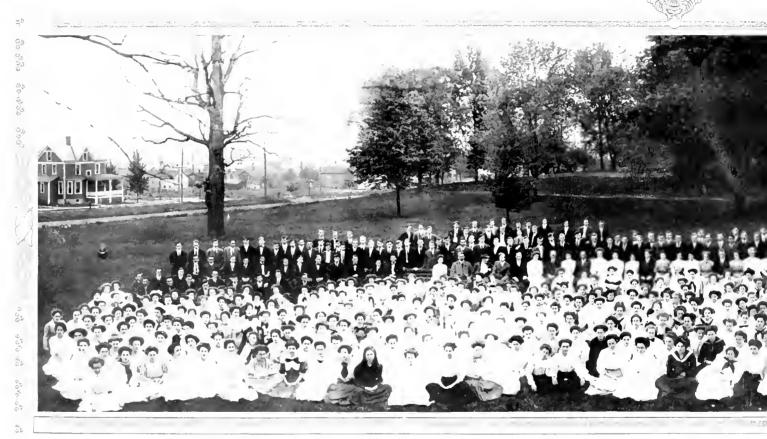

instruction to socialize a child; that is, to make him more regardful of the interests of others, less stubborn

and isolated in his individuality; that is, less selfish." In the lower grades the lessons in history are presented in story form. The children are required to reproduce what has been told and to exercise their thought power at every possible opportunity. In the seventh grade the more formal study of history is begun.

In all grades the children are required to study maps in connection with this subject. They are required to sketch freely, to indicate movements of armies, and to locate places of historical interest.

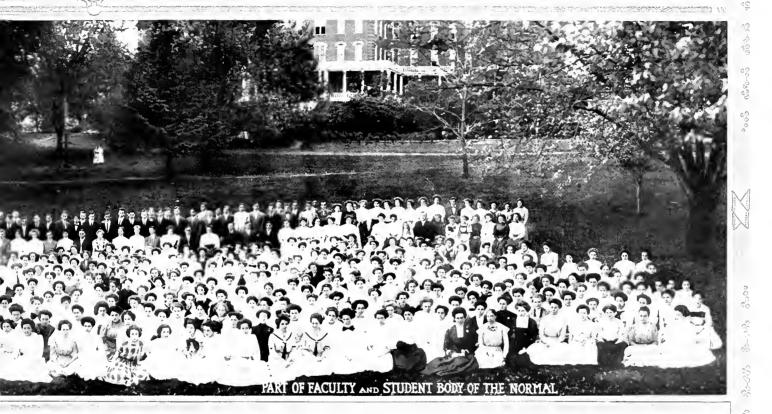

STATE

Supplementary reading is provided, the teacher drawing upon the best literature for incidents and descriptions which will make the lessons vivid and impressive. Pictures are used to show the mode of dress and the manners and customs of the people of different periods.

Much attention is given to the details of the development of civilization, and strong emphasis is

placed upon the industrial. social and moral relations of mankind.

Arithmetic

"Unless there is to be arrested development, when the child enters school, some function must be found with reference to which he may utilize his ability to count the number sense becomes vitalized and truly educative at this point by being largely directed towards the definition of values in the form or measurements."

In the first grade the exercises are chiefly counting and making comparisons, and number teaching is incidental to practically all subjects taught. In the second grade more stress is placed upon number as a differentiated study, and from this time on it occupies its separate and distinctive place on the daily program. The work in the

lower classes is very largely objective and many illustrative devices are used. Stress is placed upon fundamental combinations and processes. These must be thoroughly mastered, as they constitute the toundation upon which the entire superstructure of mathematics rests.

Oral work is prominent in all grades. It includes the development of definitions, processes, and forms STATE

and exercises in reasoning and determining results with accuracy and rapidity. All work of this kind is reasonably simple and of such nature as will be suggested by the interests and demands of daily life. The teacher must see that all statements made by the children are in clear, smooth and correct English.

PENNSYLVANIA

In all the written work sufficient attention must be given to forms of expression to insure accuracy in thought, and to teach the importance of system and neatness. There must be a constant stimulus to accurate, rapid and

independent work.

It is not deemed necessary to spend any great amount of time upon "over-difficult and complicated problems and obsolete topics not needed in modern life," but every possible application should be made to existing conditions—industrial, governmental, commercial and social.

Spelling

Every class is a spelling class in the sense that the teacher of each subject should see to it that the pupils spell correctly the im-

portant words used in each lesson. Oral spelling should precede written exercises of any nature in order that the children may be prevented from writing words incorrectly and thus become impressed with wrong forms.

The spelling lesson has a definite place on the daily program, and lists of words suggested by the needs of each class may be supplemented by lists of carefully graded words chosen from the spelling book regularly

Diacritical marking and syllabication are important phases of the work.

Course of Study in the Training School First Year READING

1. The sentence is the Unit of Expression. Think

- the sentence as a whole.
- 2. Emphasize the unit.
- 3. Analysis of Sentences into Words.
- 4. Analysis of Words into letters and sounds.
- Reading as a thought process.
- Dramatization.

Material.—The first reading lessons should be based -upon observations of Nature and upon

Girls' Basketball Team, 1910-11. Champions of Western Pennsylvania

PENNSYLVANIA

poems and stories used in same connection; also stories told for the sake of their literary or ethical merit may be employed in the same manner.

Texts: The Arnold Primer—Silver, Burdette & Co.: Stepping Stones to Literature—Silver. Burdette & Co.: Sunbonnet Babies Rand, McNally Co.: Cyr's Dramatic Readers Ginn & Co.; Cyr's Primer-Ginn & Co.; Mother Goose Melodies (Dramatized by Children); Cyr's Dramatic Reader—Ginn & Co.; The Progressive Road to Reading.

PLACE WORK

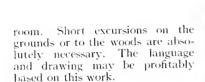

In the first two grades no special period is set apart for Geography, but all necessary ideas, as direction. points of the compass, location, seasons, prevailing winds, etc., are taught incidentally with Nature and Literature. Forms of water are observed and in connection with their study many beautiful poems and songs are taught. Field lessons afford opportunities for observing Land and Water forms, which may be reproduced on the Sand Table.

NATURE SILLDY

The children must have an opportunity of studying the actual living specimens. Many of the specimens will live and grow in the school-

View in the Red Room

- 5. Imaginary journey to the Northland.
- 6. Animal Life:

Pet rabbits kept in schoolroom. Story of Molly Cottontail (selected parts).

- 7. Storics: The Fairies' New Year Gift—Child World; The Ugly Duckling-Andersen; What Broke the China Pitcher—Cat Tails: Snowflake Story—Andersen; The Three Bears and Golden Locks.
- 8. Poems: Winter: Little White Feathers.

LITERATURE AND HISTORY

- 1. The black child of the South.
- 2. Heroes: Washington; Lincoln.
- 3. Other brave men—Postmen, Policemen, Firemen.
- 4. Brave women and children.
- 5. Brave dogs.
- Stories: Goody Two Shoes—Child World; Phil's First Valentine—Child World; A True Pigeon Story—Child World; The Constant Dove—Esop.

Special Days

Lincoln Day; St. Valentine's Day; Washington's Birthday.

NATURE STUDY

March - Beginning of Spring.

General Topics.

Trees—Maple Trees; observe changes, sap flowing, sugar making.

Buds Horse Chestnut; watch development.

Birds—Watch and note return of birds.

Supplementary work.

LITERATURE

- Stories: The Meeting of the Winds—Child World; The Maple Tree's Surprise—Child World; Why the Teakettle Boiled Over— Turner; The Figure Fairies—Turner; The Wind and the Sun—, Esop.
- Poems; What the Winds Bring—Stedman; The Swing—Stevenson; How the West Wind Helped the Dandelion; Night Wind—Eugene Field.

Special Days

Japanese Doll Festival (March 3).

NATURE STUDY

April -The awakening of new life is the underlying thought for the month.

General topics, Animals, Rabbit, fox, turtle, Birds,

LITERATURE

Stories: Madonna of the Lilies; The Easter Hare Plan Book; Bible Story of Easter; A Lesson of Faith—Child World.

Poems: The Lily of the Resurrection - Lucy Larcom; The Lily's Whisper - Child Garden; Seven Times One - Jean Ingelow.

Special Days

Easter Egg Hunt.

NATURE STUDY

May - Life in Nature; growth.

LITERATURE

Stories: Mr. Dana's Dinner—Shy Neighbors; Our Rain Frogs; The Scarecrow; The Nest of Many Colors; Legend of Robin—Norse and Indian; Origin of Woodpecker—Cook's Nature Myths.

Pochis: We Have a Secret, Just We Three; My Shadow; Bed in Summer.

Special Days

May Day; Memorial Day.

NATURE STUDY

June—Plants; Observe motion; The Flower Mission—June Plan Book.

LITERATURE

Stories: Origin of Buttercups—Buttercup Gold and Other Stories; How the Shooting Stars Came to Earth; Barnyard Talk (from the Norwegian) Child World; The Farmer and the Birds—Child World.

Poems: The Bluebird's Story; The Maiden and the Bluebird: The Sweet Red Rose.

Special Days

Exhibition of Industrial and Art Work; Flower Day. PICTURE STUDY

Through the picture the artist is introduced. Tell interesting incidents in life of artist.

St. Anthony of Padua; Madonna of the Lilies; Madonna of the Chair—Raphael; Feeding Her Birds—Millet; The Churning—Millet; Two Mothers and Their Family; The Helping Hand; Pictures of Dutch Life by Israels, Bloomers, Maria Oakes Woodbury.

Number

Children entering the first grade have already a considerable stock of number ideas. The number sense is then quite alert. The teacher should see that none of this is lost, but that the development thus indicated continues rationally without break. The first exercises should be counting and making comparisons,

Material Needed—Blocks, splints, spool, acorns, horse chestnuts, shells, etc., are valuable for counting. Every child should have a foot rule, marked in inches for measuring, and objects of various sizes for comparison.

1. Counting—In counting, the child gets an idea of the whole, the parts, and the how many.

Idea of measurement developed.

1. An unknown quantity is given to the child. as 12 blocks. Separate them into two equal parts; then combine parts to make the whole.

Idea broadened.

1. Measurement of length. Idea of Unit made more definite. Idea of "times" emphasized. Symmetrical grouping of objects with symbols, Recognition of a unity at a glance as measured by its smallest unit without counting.

2. Systematic Work with quantities as represented by figures,

Simple work with two, three, four, etc., as far as ten. This work should be parting and wholing -separate 8 into two parts, each part into two parts, and so on; then recombine by twos.

Notation of numbers to 100,

3. Outline.

Reading and writing numbers to 100.

First twenty-five combinations of two numbers whose sum does not exceed ten,

Correct oral expressions of simple addition, subtraction, multiplication and division facts.

Perception of ${}^{1}_{1}$, ${}^{1}_{2}$, ${}^{1}_{8}$ with symbols. Inch, 2 inches, 3 inches to 12 inches.

Much applied work.

INDUSTRIAL WORK

Motor expression in Reading, Nature Study, Literature and History.

Second Year

READING

Pupils should complete at least three Second Readers and much supplementary reading matter.

Texts: Stepping Stones to Literature, The Baldwin Readers; The Heath Readers, Book H.; Fairy Stories and Fable, The Three Dwellers, Hiawatha Primer, Asop's Fables, Pets and Companions, Classic Stories, Grimm's Fairy Tales, Animal Lite, Little Plays for Little People.

NATURE SILIM

September.

Fall wild flowers, leading up to "Fall Seed Study."

Legends of National Flowers. Trees to be observed. Migration of Birds.

LILLERVIURE

t. Stories: Story of Eugene Field September Plan Book; Clytie A Sunflower Story Cook's Myths; The Happy Family Adapted from Hans Andersen; Araneina The Origin of the Spider Cook's Myths; The Conceited Apple Branch - Child World.

2. Poems: September Little Boy Blue; Wynken, Blynken and Nod.

Special Day

Flower Day—Select class flower; give legends of the flower; sing flower songs.

NATI RE STUDY

October.

Tree study continued.

Fall seed study—review with pupils how and where seeds are formed.

Outline for seed study.

Means of transportation.

Wings, Hooks, Springs, Sails.

Metamorphosis of the cabbage caterpillar.

Study grasshopper in home environment.

LITERATURE

F. Stories: Story of Helen Hunt Jackson; The Baby Buds' New Clothes; Apple Seed John; Story of Columbus; The Three Chestnut Boys; Ruth and the Gleaners; Psyche's Task; The Lazy Grasshopper.

2. Poems: October; How the Leaves Came Down; The Milkweed Case; The Children's Hour;

The Mountain and the Squirrel.

SPECIAL DAYS

-Hallowe'en; Columbus Day.

NATURE STUDY

November.

Study of corn in shock.

Review vegetables. How stored for winter.

The life of an apple from blossom to storing for winter.

Interdependence—Discussion of our mode of living.

LITERATURE AND HISTORY

- Corn Literature: Hiawatha's Fasting; Hiawatha Blessing the Cornfields; Joseph and the Corn (Bible Story); The Huskers—Whittier; Corn Song—Whittier.
- 2. Historical Literature: The Pilgrims in England; The Pilgrims in Holland; The Voyage to America; The Landing—Plymouth Rock; Their Relations to the Indians—Samoset, Squanto, Massasoit; The Assistance which the Pilgrims received from the Indians.

Special Day

Hiawatha dramatized—seven scenes.

Last scene—Pilgrims and Indians seated around a table heaped with fruit, vegetables and grain. Final Song—America.

NATURE STUDY

December

It is the beautiful in literature which should be emphasized in order to develop the highest spiritual thought.

General topics.

Animal Life, Camel (large picture). Preparation—The Wise Men of the East (Story). Evergreens—Leading up to the Christmas thought.

LITERATURE

 Storics: The story of the First Christmas; Christmas Cuckoo; Christmas in the Barn— Child World. Poems: Piccola- Celia Thaxter; Children's Song
 —See Hans Brinker; Kris Kringle—T. B. Aldrich; A Story of the Forest—K. D. Wiggins.

Special Day

Christmas Exercises.

A Christmas Tree; Santa Claus; Christmas Carols and Songs.

INDUSTRIAL AND ART WORK

Lessons to illustrate the Christmas stories; Make a Christmas token appropriate to the grade; Continue raffia and reed work.

LIFERATURE AND HISTORY

January The New Year.

"The Fairies' New Year Gift" (Story). Let the aim be to present this story in such a way that the children may understand the moral lesson taught.

1. General Topics.

2. Special Study of the Eskimo (continued).

3. Study of the Animals of the North Scal, beaver, bear.

4. Birds of the North-Duck, stork, swan.

 Stories: Janu: The King and His Wonderful Castle; The Storks and the Babies—Andersen; A Legend of the Northland Carey;

The Story Mother Nature Told Jane Andrews; The Snowflake Story—Andersen.

 Poems: Phebe, or Little Red Ridinghood— Whittier; Little People of the Snow Bryant; Snowbound—Whittier; Ten True Friends.

Special Day

Hans Christian Andersen.

Dramatization of Andersen's stories.

NATURE STUDY

February—Thoughts for the month = patriotism, reverence.

Bird—Dove—A symbol of love, tenderness and constancy, as shown in the devotion to its mate and little ones.

Imaginary journey to the South.

LITERATURE AND HISTORY

1. Heroes.

Washington—As a surveyor, a soldier, a general, a President.

Lincoln—(Enlarge upon outline for first grade).

2. War stories.

3. History of Our Flag.

4. A Week with Longfellow.

5. Stories: The Tower of Justice Longfellow; The Emperor and the Bird's Nest; A Wise Old Horse—Child World; Lord Cornwallis' Knee Buckles—Child World.

6. Poems: Barbara Fritchie (selected parts);
Paul Revere's Ride (selected parts); Children's Hour (selected parts).

7. Historical Calendar—kept by pupils.

Special Days

St. Valentine's Day; Washington's Birthday; f.ong-fellow Day.

NATURE STUDY

March.—Opening of a new season.

Indications of Spring.

Effect of different animals on soil, on vegetation. Special observations.

Twigs-Pussy willow, lilac, maple, horse-chestnut.

LITERATURE AND HISTORY

- 1. Life of primitive people.
- 2. Study of the country.
- 3. Stories: The Four Winds and Hiawatha; Ulysses and the Bag of Winds; Hermes-Cook's Nature Myths; The Windmills of Holland.
- 4. Poems: Night Wind—Eugene Field; The Maiden and the Weather Cock—Longfellow; Sweet and Low—Tennyson.

NATURE STUDY

April.—Germs of life—Animal and vegetable.

Animal.

Yegetable—Nuts, plants, bulbs, and roots; where found; how protected.

Observations.

Animal life—Crayfish, tadpoles, frogs, toads. Plant life—Bean, pea, corn.

Summary of above.

Trees—Continue observation; historical trees.

LITERATURE

Stories: The Goddess of the Silk Worm; King Alfred's Candles; The Moon God—Wiltse; The Moon Maiden—Wiltse; Iris—Judd's Classic Myths; Rainbow Fairies; Old Sof's Rainbow— Cat Tails.

Special Day

Arbor Day.

NATURE STUDY

May.—Special Study of Horse-chestnut Twigs—buds in last stage of development.

Comparison of Bean plant and Pea plant grown in the schoolroom.

Bird Trades—Lead the children to discover in their outdoor lessons that there is as much difference in the architecture of nests as of homes, as to material, form, skill and beauty.

Relation of animals to soil—Earthworm; where found; form; parts; use.

Flowers—Brought into the schoolroom and grown in the schoolroom.

Page 122 us

LITERATURE

1. Stories: Carl and the Earthworms— Wiltse: The Greenies—Andersen: The Legend of the Willow-(From the Russian); The Three Wishes—(An Indian legend); Days of the Week-From "Other Lands;" Blunder—Cyr's Third Reader

2. Poems: Bird Trades—Plan Book; Wings -Mary F. Butts; May-O. B. Brown.

Special Days

May Day; Memorial Day.

NATURE STUDY

June—Review "June Ouestions" of first grade. Flowers—Weather prophets.

Things for pupils to find out:

What animals crawl.

What animals have no legs.

What animals feed after dark.

What animal has no eyes

What animals have webbed lect.

What insects buzz, hum, chirp, croak, hiss, hoot, coo.

LITERATURE

- 1. The Cuban Children—pictures of Cuban Children in their native town.—The home, games, education, dress and customs.
- 2. Clara Barton and the Red Cross.
- 3. Stories: Ceres; Amy Stewart-Wiltse; Bees' Pockets—Wiltse: The Wise King and the Bee -Cook; How the Shooting Stars Came to Earth—Child Garden.
- 4. Poems: The Pimpernel—Selected: Flowers Are Cousins to Children—Kindergarten News; A Song of Clover-Saxe Holm: The Four-

leaf Clover-Youth's Companion; The Pansy Fairies—A. C. Hopkins: A Little Girl's Fancies —Selected.

PICTURE STUDIES

Puritan Pictures—Boughton: Madonna Pictures— Murillo; Child Life Pictures—Jessie Willcox Smith: First Steps-Millet: Animal Pictures -Cats, Madam Ronner and Adam; Dogs, Landseer; Sheep, Rosa Bonheur and Anton Mauy; The Strawberry Girl-Reynolds; The Lesson-Bougereau.

NUMBER

Outline Review work of first year.

Notation and numeration continued by teaching "100" as a new unit,

PENNSYLVANIA

Writing numbers as far as 1,000,

Perception of any simple work with 1-2, 1-4, 1-8, I=16, I=3, I=9; I=2, I=5, I=10; I=2, I=7, I=14, with symbols, fractions, disks, picture circles on board, etc.

Idea of square inch developed, and simple measurements of surfaces by square-inch tablets.

Simple idea of volume.

Liquid measure complete. Roman numerals I XII. inclusive.

Related facts (12 in a doz.; 24 hours in a day).

INDUSTRIAL WORK

Motor expression in Reading, Nature Study, Literature and History.

Third | Year

READING

During this year pupils should read at least five Third Readers, together with such supplementary reading as may be correlated with their work in nature study, history,

geography and literature.

At the end of this year pupils should be able to ead readily and in pleasing style, matter within their comprehension in thought and language.

Texts: Robinson Crusoe Baldwin; Fifty Famous Stories—Baldwin; Old Greek Stories—Baldwin; Third Reader—Carroll and Brooks: Dramatic Reader. Book IL—Stevenson.

LITERATURE

In the third grade we wish to bring a number of mythical stories vividly before the children; therefore, we base the work on Hawthorne's "Wonder Book." using three periods a week during the winter term. The best stories for use in this grade are, The Golden Touch, The Miraculous Pitcher, The Gorgon's Head.

"These stories introduce to the children the company of simple, but great characters, whose deeds of generosity and unselfishness are the climax of the stories." "These early myths afford also an interesting approach to the history and geography of many important countries." The children should be led to see that these stories are made up of several shorter stories. which they may name for themselves.

Other literature suitable for use in this grade: Esop's Fables; Story of Joseph—Bible. Memory Work

September-Helen Hunt Jackson; One, Two, Three -H. C. Bunner; How the Leaves Came Down-Susan Coolidge; The Wise Fairy—Alice Cary; The Miller of the Dee-Charles Mackay; The Child's World-Lilliput Lectures: A Visit from St. Nicholas—C. C. Moore: A Dutch Lullaby— Eugene Field: Robert of Lincoln-Wm. Cullen Bryant; The Sandpiper—Celia Thaxter. Books to be Read to the Children

The Children's Hour—Book 1; The Story Hour— Kate Douglas Wiggin; Black Beauty—Anna Sewall. In all of this work the children should be encouraged to dramatize, and illustrate on blackboard, or with ink, water-colors or charcoal, the stories they study. NATURE STUDY

Fall.

September Flowers; Special study of Clover. Migration of Birds; Nuts, Frost. Special Study of the Rabbit.

Spring

Birds; Wild Flowers-Special study of the Dandelion.

HISTORY

Discovery of America; stories connected with Indiana; stories suitable for national holidays, particularly stories of bravery; community life of early settlers.

LANGUAGE

Guide Book to English-Harris and Gilbert. Selected Lessons.

In the fall and spring terms the work in Nature Study and History will furnish a basis for the Language work. During the latter part of November and in December the work will be based upon the Thanksgiving and Christmas holidays.

The work planned for literature will be the basis for the Language work during the winter term, together with stories from history.

No attempt is to be made to force technique upon the pupils before it is needed, but as difficulties arise and definite instruction is required, such instruction should be given in definite lessons and repeated till the points are made perfectly clear, and right habits started. Suggested Exercises.

Telling stories for oral reproduction, followed by written reproduction.

Dictation, always of connected thought.

Silent reading of short selections by the children, who afterwards reproduce them orally.

Illustration upon paper or blackboard of scenes and stories reproduced by them.

Memorizing of one poem each month.

Dramatization of stories, poems and pictures.

Letter writing.

Picture lessons.

Daily written lessons on the blackboard.

Pen and ink work begun.

Interest the pupil in good language.

Help him to make it a habit. Work for fluency, but attend also to sentence structure. Teach proper

capitalization and placing of title; margin; indentation of first line; use of capitals, periods and question marks. Begin use of quotation marks.

GEOGRAPHY

First term—None.

Second term—One day a week. The Tree Dwellers. Third Term—The Cave People, Seven Little Sisters, Wants of Man, Our Homes, Our Neighbors, and

Ourselves, Maps of schoolroom and village. Village of Indiana—name (why so called), location, physical features of the locality, history and growth, organization, productive occupations, commercial occupations, educational and social institutions, government.

INDUSTRIAL AND ART WORK

Prang's Course of Study in Art; modeling in plasticine, weaving of rugs, washcloths and dolls' hammocks. Material—Roving, macreme, cord, cheese-cloth,

Picture Study—two each term. Landing of the Pilgrims-Boughton; Arrival of the Shepherds-Lerolle; The First Step—Millet; Children of Charles I—Van Dyke: The Pet Bird—Meyer von Bremen: Piper and Nutcracker—Landseer. Arithmenic

Milne's Progressive Arithmetic.—First Book, to

Books not in the hands of the pupils till the subject is thoroughly taught, thus using them

At least fifteen minutes of oral work should be given at the beginning of each recitation.

Simple problems should be written out on paper. Every subject should be developed through the handling of various concrete materials. Each child should handle the material and should construct and do at every step of the process. Each step must be supplemented by the introduction of many like problems. SPELLING AND WRITING

Graded School Speller, Spaulding and Miller. Every written lesson should be a writing lesson. In every lesson only the best written work is to be accepted from the pupil. Special attention is to

be paid to the form, slant and uniform size of the letters, and much practice in board work is to be given. Pen and ink work is begun in this grade. Shaylor and Shattuck Medial Writing Books.

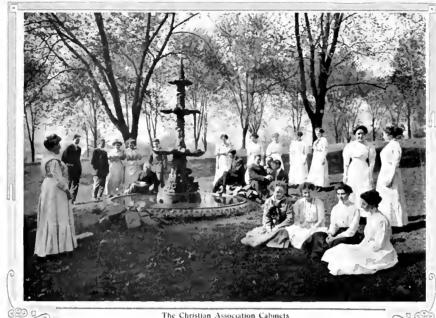

Fourth Year

READING

The pupils should now be able to read fluently and for the sake of what they read. While continued attention should be paid to the art of reading, the pupils

should always realize that they are reading as adults read to get the thought of the author, and not for

the sake of going through the exercise. They should also think about reading to entertain their classmates, Texts: Old Stories of the East Baldwin: The Louisa Alcott Reader: Silver Burdett Reader - Fourth Book, Child's Garden of Verses, Selections; Fourth

Reader—Carroll and Brooks.

LHERALURE

The work during this year is based on "Robin Hood." as arranged by Howard Pyle. "In the oral treatment of these stories the teacher must thoroughly enjoy the stories herself, and in giving them to the children lose herself in the tone and spirit of the account." These stories give an insight into English customs, feudalism, English character, and English ballad literature

The ballads associated with Robin Hood should be read to the children.

During this year, we study Stevenson, Longfellow and Whittier and memorize the following poems:

The Land of Story Books, My Shadow, Bed in Summer, The Wind-Robert Louis Stevenson.

The Children's Hour. The Village Blacksmith, Paul

Revere's Ride—Henry W. Longfellow.

The Corn Song, The Barefoot Boy, In School Days John G. Whittier.

Stories which should be Read to the Children

Birds' Christmas Carol - Wiggins; Little Lord Fauntlerov Burnett.

The Children's Hour, Vol. 11,

NATURE STUDY

Fall Term.

Seed Dispersal; Leaves; Fruits—special study of "The Grape;" Trees and Forests.

Spring Term.

Seed Germination; Elementary Forestry (Hodge); Insects of the Household; Buds.

History

Story of Cleo the Greek Boy; Institutional Life of the Barbarous Indians; Stories related to national holidays; Stories of Pennsylvania. Pictures should be used at every step, and models of the people, houses, and ships should be made.

LANGUAGE

Guide Book to English; pages 70-141.

As in the third grade, the language work is based on the work in Nature Study during the fall and spring terms, and on Literature in the winter term, with History lessons throughout the year.

Suggested Exercises.

Continue the work of the third grade in sentence construction and in the correct use of sentences of different kinds.

Require much oral reproduction, and original work, both oral and written; oral work should always precede written work.

Give attention to paragraphing and correct use.

Compositions may now take definite form.

Give lessons in letter writing, seeing that all the details are properly observed.

Encourage freedom and independence of expression, making outlines broad.

Encourage children to find and reproduce short anecdotes and short stories of animals.

Select and copy choice paragraphs.

GEOGRAPHY

First Term.

Pennsylvania studied according to General Outline for study of a Continent.

Name—spelling; significance or history.

Corridor Third Floor, Thomas Sutton Hall

Position indicate on map or globe; relative position; actual position.

General shape—draw simple freehand outline map.

Size -comparative; actual; time to cross, etc. Coast - extent and general character; indenta-

tions and projections.

Surface and soil mountains; location; direction; height; effect on country; importance. Plains and valleys (same points). Material needed—sand map, relief map.

Drainage—lead children to see what characteristics of drainage must be; names and location of principal rivers and their importance to man; special study of a few typical rivers. (Ohio in Pennsylvania.)

Climate—lead pupils to discover.

Products vegetable, animal and mineral.

Type study.

Industries what—deduced by children from previous knowledge gained; how carried on. Commerce and means of transportation.

Political division.

Cities—lead children to determine where great centers of population must be, and why; teach names and location of important cities by taking a trip around the state.

Government form; leading officials; capital city.

Additional points concerning people material condition; education; religion; history.

Second Term.

"The Earth and Its People" Winslow, Lessons 1 XXIV.; Making of relief maps of the United States.

Third Term.

"The Earth and Its People" completed.

INDUSTRIAL AND ART WORK

Samplers showing chain, blanket, outline, overhanding and cross stitches.

Stenciled mat.

Stenciled and embroidered book-bag.

Articles from tilo-matting.

Prang's Course in Art.

Picture Study: Pilgrim Exiles Boughton; Adoration of Shepherds Bougereau; Song of the Lark Breton; Aurora Guido Reni; Shoeing the Horse Landscer; Morning in the Highlands Bonheur.

ARITHMETIC

Milne's Progressive Arithmetic - First Book, Pages 170 to 288.

Book used for drill only.

SPELLING AND WRITING

PENNSYLVANIA

Graded School Speller-Book III.

Every written lesson a writing lesson. Shaylor and Shattuck Medial Writing Books.

HYGIENE

"Good Health."

Fifth Year

READING AND LITERATURE

Stepping Stones to Literature—Book Four, The Health Reader—Book Four, and matter selected from good literature appropriate to the work of the grade.

Supplementary reading based upon History, Geography, Nature Study.

Children are encouraged to take books from the school library for home reading.

Suggested Texts

Short Stories from English History-Blaisdell; Favorite Greek Myths-Hyde; Black Beauty; Hiawatha; American History Stories-Pratt; Plants and Their Children—Dana: Short Stories of Our Shy Neighbors—Kelly.

Stories to be Read to the Children

The Story of Siegfried-Baldwin; Norse Stories-Mabie: Little Men-Alcott; Selections from Heart of Oak, Vols. 3, 4, 5.

NATURE STUDY Fall Term.

- 1. Fall Flowers.
- 2. Garden Work.

Fall exhibit of flowers and vegetables raised in gardens at home; gathering of flower seeds.

3. Insects: Grasshopper and Cricket.

Spring Term.

1. Bird Study. "Our Common Birds-Their Life, Work and Natural Enemies."

Renew acquaintance and add to list of birds. Birds studied in their native homes on Normal

How to attract Birds to Our Homes-Hodge. Chaps. 20, 21.

Economic Value—Hodge. Study of songs and calls.

Bird enemies; protection.

Bird Census. Have children make bird census of Normal Campus. See Hodge, Chap. 19. Special study of the robin, red-winged blackbird and purple grackle. Bird Day Exercises.

PENNSYLVANIA

2. Wild Flowers.

Continue work on flower calendar begun in Primary grades.

Add many flowers to list; continue field excursions.

- Garden Work; Competitive Flower and Vegetable Culture.
- 4. Familiar Aquatic Animals; the common toad, its life story and work

History

The work in History is used as a basis for Language work during the winter term.

Stories of American History. Tales of Troy—De Garmo. Stories of Norse Gods and Heroes—Klingensmith. English History Stories.

LANGUAGE

The material for language lessons is drawn from the child's environment, and from other subjects of the curiculam—History, Literature Geography, and Nature Study.

Selected Lessons from

Cooley; Language Lessons from Literature Book 1. Suggested Exercises

Work of the third and fourth years continued.

Writing of stories upon various topics.

Use varied forms of composition.

Letters written, and journals kept in connection with imaginary travels in Geography. Both oral and written reproduction of stories

PENNSYLVANIA

from English History, Greek and Norse mythology.

Much story work in connection with lessons in Nature Study. Description, biography and personification.

Literary Society -stories and themes drawn from written work in language recitations. dramatizations and other exercises correlated with work in Literature, History and Nature Study.

CHOGRAPHY

- 1. Short review of North America as a whole. (See outline for Study of Continent.)
- 2. United States, first as a whole, then by sections.
 - New England States: Middle Atlantic States; Southern States: Central States; Western States.
- 3. Canada and Newfoundland, first as a whole, then by sections.
 - Trips and type studies; Fisheries of Newfoundland and East Coast: Farm Life: Visit to Ottawa and Ouebec: Winter Sports in Canada; With the Trapper in Canada; the Lumberman's Life in the St. Lawrence Basin.

4. Mexico.

Introductory Lessons; Trips from Montreal to New York; to Vera Cruz; Trips from Vera Cruz to City of Mexico; Products of the Coastal Plains; Silver Mines; Tropical Forests of Southern Alexico; Type Study—Cocoa.

5. Central America.

Study of Central America may be brief, bringing out points in which that country differs from Mexico. The work may include a bird's eye view, reading lessons and a type study upon coffee.

6. South America.

For general work see outline for study of continent—
Fourth Year; Trips and Type Studies; A Trip on the Amazon; Life on the Pampas; Visit to City of Buenos Ayres; The Orinoco and the Llanos; Up the Andes; Brazil and its People; Coffee Production; Rio de Janeiro and Santos—Exporting Coffee.

Industrial Work

The work in the Fifth and Sixth Year is divided into two sections:

In the Main Corridor of the Girls' Dormitory

Industrial Work for Boys.

Rattan Table mats; work and waste baskets.
Whittling.

PENNSYLVANIA

Industrial Work for Girls. Raffia Indian baskets. Sewing.

DRAWING

Prang's Course of Study in Art Supplementary Work Applied Arts Drawing Books.

Puture Study Sistine Madonna Raphael; Return to the Farm Troyon; The Horse Fair Rosa Bonheur; At the Watering Trough Dagnan-Bonyeret; Christ in the Temple - Bonheur.

ARITHMETIC

I! a milt on's Intermediate Arithmetic—Fifth Year.

WRITING

All written exercises are considered as writing lessons. Copy book is used when needed for drill. Shaylor & Shattuck System of Medial Writing.

SPELLING

Words for written exercises are selected from the various lessons, and should include words misspelled or likely to be misspelled by the children in any written exercise.

Children should learn to divide words into syllables.

The use of the dictionary is encouraged.

Lessons taken from Graded School Speller, Spaulding & Miller,

HYGH YE

"Emergencies."

Sixth Year

READING AND LITERATURE

Reading matter selected from standard authors, and, in so far as possible, correlated with the work of the other departments, particularly Nature Study, History and Geography.

Suggested Texts

Harper's Fourth Reader; The Heath Reader—Book Five; The Story of the Greeks—Guerber; Story of Æneas— Clark; Selections from Open Sesame, Vols. 1, 2, 3.

Stories to be read to the children:

Ten Boys—Andrews; Heroes of Chivalry—Maitland; Wee Willie Winkie—Kipling; Legends of the Rhine—Guerber; Hans Brinker—Dodge,

NATURE STUDY

Fall Term

1. Fall Flowers.

Study the life history of a few of the familiar flowers growing near the school. The nasturtium, toad flax and scarlet geranium.

2. Garden Work.

Fall exhibit of flowers and vegetables; gathering of seeds.

3. Insects: The Honey Bee.

Spring Term.

- Bird Study. Continue work of Fifth Year. Special study of the oriole, cathird and English sparrow. Bird Day Exercises.
- 2. Wild Flowers. Continue work of Fifth Year.
- 3. Competitive Flower Culture.

4. Insect Study.

Insects of the garden; Beneficial Insects, Continue insect study into Fall Term. Aim to complete life histories.

HEALTH LESSONS

Work based upon the Gulick Hygiene Series, Book One—Good Health.

History

The Story of the Romans; United States History Stories; Historical Stories of Europe and Asia.

LANGUAGE

Much of the work in this year does not differ materially from that done in the Fitth Year. The subject matter is drawn from the other subjects of the curriculum History, Literature, Geography and Nature Study.

Work of the Fifth Year continued.

Give considerable attention to the exact use of the sentence.

Direct and indirect quota-

See that written work is divided into paragraphs in this as in all grades.

Selected Lessons from Cooley's Language Lessons from Literature Book L. CHOGRAPHY

1. Europe.

The study of Europe is conducted, as was the study of North America, by "trips" to the places of interest and importance,

The study of the grand division, as a whole, is taken up first and compared with North America as to relief. climate, drainage. (See ontline for study of continent.)

After the voyage of steamer from New York to London, each

country is visited and special points noted.

2. .1sia.

The study of Asia is conducted as was that of North America and Europe.

A few important topics are studied as centers and types.

A general view of the country is gained by

imaginary travels through the continent.

China, Japan and India are studied with greater attention to detail.

DRAWING

Prang's Course of Study in Art.

Picture Study—St. John and the Lamb—Murillo; The Angelus—Millet; The Lion of Lucerne; Spring—Anton Mauve; The Windmill—Gabriel.

INDUSTRIAL AND ART WORK

Industrial Work. See Fifth Year.

Arithmetic

Hamilton's Intermediate—Sixth Year.

Writing

All written exercises are considered as writing lessons. Copy book is used when needed for drill. Shaylor & Shattuck System of Medial Writing.

SPELLING

Words for written exercises should include words misspelled in any written exercise. Lessons taken from Graded School Speller —Spaulding & Miller.

HYGIENE

"Town and City."

Seventh Year

Language
Literature.

The Courtship of Miles Standish; Longfellow's shorter poems; The Christmas Carol; Rip Van Winkle; The Legend of Sleepy Hollow; The Wonder Book; Whittier's shorter poems; The White Seal, Kipling; Lives of the Hunted, Thompson; Biography of a Grizzly, Thompson.

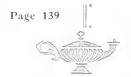

Theme Work.

Closely correlated with other studies, especially with History, Geography and Literature. Imaginary journeys, dialogues, and personifications; Reproduction, character sketches and letter writing.

Formal Language Work.

Review and application of rules taught in preceding grades. Punctuation, paragraphing and capitalization. Selected Lessons from Cooley's Language Lessons from Literature, Book II.

English Grammar.

The simple sentence and its parts—subject, predicate, complements, word and phrase modifiers. Analysis and diagramming. The parts of speech.

CIVICS MUSIC DRAWING SPELLING

Credit is given in the Normal Department for much of the work completed in the Ninth Year.

Music in the Training School

The music of the Training School is under the direct supervision of the Director of the Conservatory of Music, and is taught by members of the Supervisor's class. Members of the Senior class observe the work, and in turn are required to teach.

The course of study is carefully prepared and the work of the grades conducted after the best known methods.

Teachers are carefully trained in all that is required of an expert supervisor, and the music of the Training School is a pronounced feature.

Course of Study for the Eight Grades

FIRST GRADE

Many rote songs well learned, with careful attention given to quality of tone, sense of rhythm and

A Class in Shorthand

development of pitch. Typical forms are selected leading to the subsequent work of teaching the elements.

Ear training, oral dictation, first rhythm form, monotone work, individual work, the phrase, the scale in song, the representation of scale, easy interval drill and much repetition is the work of the first year.

SECOND GRADE

Work of first year continued. More difficult exercises in all phases of the work. Written dictation by teacher, reading music by motives and phrases a

In the Principal's Secretary's Office

marked feature (rather than by single notes), this being the basis of all subsequent grade work. A little written work by children, such as a staff, clef, letters, etc. Second rhythm form. Individual work.

THIRD GRADE

Previous work continued. Two-part work begun, Written and oral dictation by teacher and pupils, Difficult interval work. After beat-note carefully developed. Extended rhythm forms. Development of rapid sight reading by means of phrase and period.

FOURTH GRADE

Careful review of previous work. Chromatics taught down and back a half-step, using sharp, double sharp and cancel. The dotted quarter-note or third rhythm form note, two-part singing, oral and

written dictation, songs read at sight, continued drill in every phase of the work. Further development of rhythm forms.

FIFTH GRADE

All chromatics up and back a half-step, using flat, double-flat and cancel. Much attention paid to sight reading (by phrase always) with such drill on single tones as may be necessary. Never losing sight of correct expression, quality of tone and all that leads to artistic singing.

SIXTH AND SEVENTH GRADES

Sharp review. Minor scales. Three-part singing, Melody writing. Individual sight singing. Biographical sketches of great musicians. Frequent recitals given by advanced students of the conservatory as a means of cultivating a taste for the best music. All major and minor keys mastered.

EIGHTH GRADE

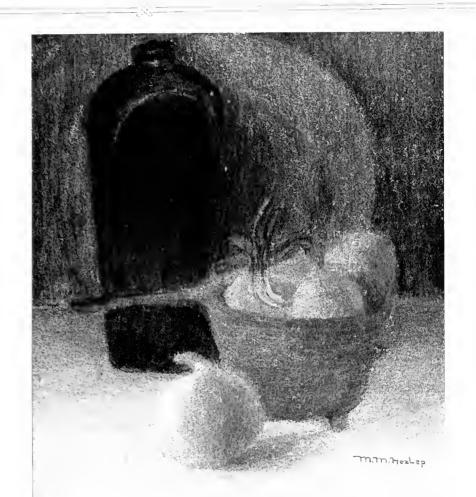

Bass clef taught to boys with changed voices. Threeand four-part singing. The Natural Music Course, Modern Music Course and New Educational Course are all used in the Training School.

The aim of the work in music is to fully develop a love for the best, as well as the ability to sing at sight, in a truly musical manner, anything placed before the child.

The School of Business

Successful men and women of every calling in life recognize the advantages of a thorough business education. To those who intend pursuing an active business career, such training is an indispensable aid, if

not a necessity. For this reason, and in order to furnish teachers for business departments in high schools, several years ago the commercial department was added to our school. Its object is to instruct, young men and women in the laws, customs and forms of business: to cultivate in them habits of neatness, accuracy and thoroughness of work; to familiarize them with practical business problems. and in every way possible prepare them for successful business lives. The teachers are of the regular school faculty and are specialists in their several lines.

Modern Illustrative Book-keeping, Williams and Rogers Series, is used for the Theory department. This system grounds the student in the simplest and most elementary principles of accounting first. Then it takes him through successive operations to the most

up-to-date special column books for businesses of various kinds single proprietor, partnership and partnership settlements, corporation, manufacturing, and so forth.

After completing the text book, the student takes up "Three Weeks Business Practice," a system of actual business conducted through the offices and

school bank. At the end of this work he is started in the bank as File Clerk, from thence working his way up until he finishes as Cashier.

Special instruction is given in the many uses of the Burroughs Adding Machine, of which the school has two latest models. Burroughs Business Practice Handbook and Cost Keeping Shortcuts, together with a great numher of loose forms and balance sheets are used in the instruction work. Business men are demanding that those they employ be familiar with adding-machine utility, and we are well equipped to give our students a thorough drill in this.

In the Shorthand and Typewriting Department it is our aim to prepare students for such duties as every stenographer must perform, whether employed as amanuensis, private secretary, or reporter. In every line of employment -commercial or professional--there is an active demand at all seasons for good stenographers. No other profession offers so many opportunities for the ambitious young man or young woman to advance to positions of in-

fluence. All that is necessary to enter upon this line of work is the requisite preparatory training which we aim to provide for here.

We teach Graham Standard Phonography. Nearly half the professional shorthand writers in the United States write this system. Its superiority over all the "easy to learn" systems lies in the fact that the student may push it to any desired rate of speed. Many inferior systems, so widely advertised today, are adequate only for certain limited requirements of amanuensis work, where speed is not essential. After mastering thoroughly the scientific principles on

which Standard Phonography is built, even indifferent penmen are able to follow the utterances of the most rapid speakers.

Up-to-date filing systems are taught in this department, and our students will go out well prepared to meet any requirement in this important and indispensable business art.

Time Required

Our Commercial Courses are longer than those of many business schools, but we do not believe in grad-

PENNSYLVANIA

A Class in Typewriting

uating any student who does not have at least a good common school education, and we include, therefore, all the common branches in our Commercial Courses. Our graduates are thus well equipped and are preferred candidates for positions over persons who have taken only commercial branches proper. Our commercial students enter the classes in Grammar, Composition, Civil Government, United States History, Geography, Spelling, Arithmetic, etc., along with the students who are taking the regular Normal Course, and are required to do the same work in these branches as those who have to pass the State Board examinations. Special examinations are given in these branches, and students need not take such studies in class as they are able to pass in this way. Graduates of high schools on the accredited list are given credit in this

Department for certain of the above named studies without taking this examination.

Some Advantages of Taking a Commercial Course at Normal

In addition to the splendid conjument of the Department itself, commercial students at Indiana have many advantages absolutely unknown at the great majority of business schools. They have access to the large Normal Library and Reading Room. The latter is equipped not only with all the leading magazines and daily city newspapers, but also with the weekly publications from the home towns of many of the students. Commercial students are always welcome additions to the literary societies, debating clubs and Christian associations of the school. Socials, lectures, concerts, plays, etc., provided by the Normal School, are at the disposal of the Commercial students. Many young men who come to Indiana for business courses, in addition to securing the business training for which they come, develop into great athletes. Our expert coaches always find the earnest, hard-working commercial students a splendid body from which to build up their great football, baseball and track teams.

Music.—Students taking the Commercial Course have an excellent opportunity to take voice culture or instrumental music along with the commercial work. Many students do this.

Lectures.—It has become a part of the settled policy of this institution to give to its pupils the opportunity to hear in their own halls lecturers of eminent ability on subjects supplementary to the regular work, or of universal interest.

Actual Business.—Students will find at the Indiana Normal a thoroughly equipped Office and Banking Department.

Influence.—It pays to attend a school that is widely and favorably known, for much of the future success of the student depends upon the character and influence of the school from which he graduates. An Indiana diploma is a passport into the best positions of the State.

Positions

We do not guarantee positions to the graduates of our Business School, but we are watchful and zealous in our efforts to place them as soon as they step out of the school. At the present time we are unable to supply the demand for our graduates, and we do not doubt that this condition will continue.

Detailed Information

If you desire to know more of the work done in our Shorthand, Bookkeeping and Banking Department, address A. E. Kinsley, Head of Business School.

Commercial Course of Study

Bookkeeping (three terms)—Single and double entry, commission, retailing, manufacturing, and banking.

Borroughs Adding Machine practice.

Arithmetic (three terms)—Rapid calculation.

Spelling (one term)—Articulation, orthoëpy, diacritical marking.

Writing (one term)—Position, movement, exercises, practice.

Reading (one term)—Articulation, voice culture, reading.

Geography (one term)—Political.

Commercial Law (one term)—A thorough course of Business Law,

Class in Banking

Composition (one term)—Same as Normal Course. History (two terms)—United States History completed.

Grammar (three terms)—Same as Normal Course. Civics (one term)—United States and Pennsylvania. Algebra (two terms)—First two terms of Normal

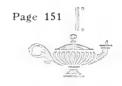

Course.

Correspondence (one term)—A thorough course in Business Letter Writing.

Typewriting (three terms)—Van Sant "Touch Method."

Shorthand Course of Study

Shorthand (three terms)—Graham Standard System.

PENNSYLVANIA

Arithmetic (three terms) - Rapid Calculation.

The Normal Conservatory

Studio in the Conservatory

Our aim is to make this school in every respect all for which its name stands. The work of the Conservatory is most carefully to develop both the technical and the artistic, while the Normal Training work is calculated to prepare the teacher.

It matters not whether it be Voice, Piano, Violin or the Supervisor's Course that is being pursued, our aim is carefully to train both the artist and the teacher in such a way as to fit them for life work with so sure a foundation and so thorough a knowledge that they may reflect credit not only upon themselves, but also upon the school. The Conservatory is conducted after the manner of the best, found either in this country or in Lurope—The Normal training will be quite distinct in itself, certain features of which can be found in no other school in the country.

The Teachers

The teachers are those of experience and have won for themselves pronounced distinction both as teachers and artists, representing the best training in leading conservatories and music schools, and with the best of private teachers. All are influential in stimulating their pupils to put forth their best efforts, taking a personal interest in each individual. Those who come here for simply "a good time," will not enjoy the school, as the spirit of progress and work is fostered and insisted upon. Pupils are brought into such close relations with the teachers in their everyday work that they are constantly receiving an impetus for good along all lines. Frequent recitals, both private and public, concerts, ensemble, all combine to create an atmosphere of industry. Parents may rest assured that their children will find friends as well as instructors in the teachers.

Courses of Study

The courses of study embrace all that is necessary in order to acquire a thorough technic, artistic interpretation and a musical education in its fullest sense. Students may elect the major subject either in Voice, Piano, Organ, or Violin or other orchestral instruments. In this they receive two lessons per week. Students who elect as the major subject either Voice or Violin will be required to take one lesson a week in Piano until they complete the Junior course in the same. The Piano is made the basis of all courses of study. While we outline a three years' course corresponding to those of the State Normal School, it must be understood that

it may take longer to complete a course in music, and on the other hand a good student might be able to do the work required in less than three years. Next year the course will be changed to a four-year course. Where students have never studied theory—that is, Harmony, Counterpoint, History of Music, etc.,—it will require at least two full years to master these subjects, all of which are necessary before one earns the right to be called a musician.

PENNSYIVANIA

Supervisors' Course

We desire especially to call attention to the superior advantages found at Indiana for the training of Supervisors of Music for public schools. It was largely owing to the fact that the Director of the Conservatory, after years of experience and observation, while visiting schools in different parts of the country, became convinced of the need of a more thorough training on the part of the supervisor as well as of the grade teacher, that he was led to give his assistance in the establishment of a training school where both knowledge and

experience could be obtained by those who wished to enter this important and wide field of labor. The course embraces all leading systems and methods, and our graduates are prepared to use any one of them.

After a careful study of methods, devices, etc., students are required to give experimental lessons before the class, following which free criticism is made both by members of the class and the teacher in charge, and when found proficient they are required to teach throughout the several grades of the Model School, which enrolls upwards of two hundred children. In

addition to all this, graduates must have completed the required course of study in Voice, Piano, Theory, History of Music, English, Pedagogy and Psychology. Theory of Music includes Harmony, Counterpoint to Fugue writing, and Instrumentation to the extent of being able to arrange music for instruments of the modern orchestra, as we contend that every supervisor should be able to do this in order to afford pupils who play such instruments as violin, cornet, flute, etc., an opportunity to accompany the voices as well as to improve themselves.

We are continually receiving letters of inquiry for good supervisors, and we advise Normal graduates and experienced teachers to take up this work, provided they are musically inclined. There is a great demand for Supervisors of Music and Drawing, the two working well together.

Additional information can be had regarding this course by corresponding with the director.

Preparatory Course

For all students who may elect a regular Course and are not prepared to enter the Innior Year, a Preparatory Course is provided which includes such studies as are necessary to prepare them for the regular Course. This course can be taken only in class of two at a reduced rate. or at regular rates as the student may elect.

Juvenile Course

This course is for beginners under fourteen years of age who may desire to study either piano or violin. There will be two pupils in a class and the period is divided between them. The tuition is about one-third the regular rate. This course includes one lesson a week in violin or piano.

Private Lessons

While it is required of all graduates that they take a full

course, any may take such lessons as they desire upon the payment of the regular rates specified in the catalogue.

Class Lessons

Harmony, Counterpoint, History of Music, Solfeggio, Sight Reading, etc., will be taught in classes. Students not taking a regular course have the privilege of entering these classes and will be charged the regular tuition.

Examinations

Regular term examinations will be held, and those taking a full course must give satisfactory evidence of having met the full requirements before being promoted to a higher grade.

Literary Requirements

Candidates for graduation will be required to show a thorough knowledge of the "common branches." Graduates of high schools or those having passed the Junior year of any State Normal School are accepted without examination.

Diplomas

Diplomas will be granted to those who complete a full course.

The Choral Society

The Choral Society, including the students and leading singers of the town, is a pronounced feature of the musical life of the school.

Works such as "The Messiah," "Elijah," "Creation," "Joan of Arc," "Fair Ellen," "Phaudrig Crohoore," "Gallia" and many miscellaneous numbers have been given.

The Pittsburgh Festival Orchestra and leading artists are brought each year, and the annual "Music Festival" has been a great success.

The Madrigal Club

The Madrigal Club is a vocal musical organization for women students only. The best part-songs are presented from time to time.

Orchestra

There are two orchestras maintained, one for advanced students and one for beginners. This affords

Prof. Jack and His Track Team

all who study orchestral instruments an opportunity to play under an experienced conductor.

String Quartets and ensemble of various instruments are frequently called together for the benefit of those who play such instruments.

Expenses in the Conservatory

See Index in back of catalogue.

Information

For further information, apply to the Director, Hamlin E. Cogswell, for special catalogue.

Alumni Registry

Following are the names of the graduates of this school arranged in alphabetical order. This facilitates the finding of any name belonging in the list. Opposite the name, the year of graduation is given, and as the Class Directory follows this list, one can turn at once to the person's class, obtain his address, and the list of his classmates.

once to the person of a		me transcess, and the fist o	i ms cm	SSHIRITUS.			
Adair, Jennie M	1885	Baer, Flora	1902	Bennett, Mabel Rose	. 1000	Breniser, Cyntha	1880
